About this Document

This document is about the features and functionality of Trading Terminal through which a user can place orders and view current market stats in real time. It intends to guide the user of the application about all views and windows available so that he/she can use it effectively. The document discusses different types of views available in the application as well as different customization options to customize these views according to user preferences.

Audience

As this document is all about the features and usage of online trading terminal, it is intended for all users of Online Trading.

Conventions

CONVENTION /STYLE	Purpose
Bold	Name of application objects, e.g. menus, screens, buttons etc.

Introduction

Trading Terminal is an online trading application that offers the ability to buy and sell shares and view real time stock exchange information. Trading Terminal client is installed on the system. This client gets connected with the Trading Servers. Trading Servers has different components running. A main component is Message Server which is connected with a Trading Engine. Trading Engine is responsible for executing trades. Other server side components are Feed Server, Feed Reader, Sub Feed Server, FIX Gateway etc. These components are responsible for various server side operations. This manual covers client portion of the Terminal only. This Terminal (client) offers a variety of different useful menu options to facilitate sale/purchase and manage client information efficiently.

Trading Terminal provides following advanced features:

Different perspectives named Report, Charts, Research, Social and Trading are available which provide user interface for different views and operations.

All basic views and operations are available in Trading Perspective. In this perspective current market statistics for different stocks are available. This perspective also provides exchange metrics through a number of watch lists e.g. New Watch List, Index Watch List, Market Watch List and PMEX or NCEL watch list etc. Order book and Trade log views are maintained which keep record of all pending orders and executed trades respectively. A file is also maintained keeping record of all of the current day trades. Buy, Sell, Take, Hit orders can be placed and user can also modify/cancel his/her pending orders. Client margin is checked in real time during order entry taking into account the client's executed trades and pending orders. Client can view his/her current clearing and overall portfolio positions.

Charts perspective provides different stocks and exchange statistics. Advanced charting module is provided containing Symbol and Index graphs.

All of the views can be customized according to user preferences and the customizations persist even after exit from the application and are restored on start up.

Application Screens

TERMINAL OVERVIEW:

MENU BAR: Contains Basic Function such as File, Edit, and Watch list, Views, Report, Utilities, Windows and Helpetc.

Windows:

MARKET WATCH LIST: Allows you to assemble a customize list of symbols and view data for each symbol.

1 Definitional

Navigation:

Start Menu > Programs > Softech Trading Terminal > Trading Terminal.lnk

By default, Trading Terminal is installed in Start **Menu > Programs > Softech Trading Terminal** folder of start menu. **Start Menu > Programs > Softech Trading Terminal > config.ini** file contains some configuration parameters that are appropriate when application is installed. These can be modified later if required. Once the installation completed short cut will also appeared on the desktop.

JAVA INSTALLATION

User doesn't require installing java prior installation of eclipse trading terminal because the installation package for eclipse online trading terminal includes with java installation.

✖ CONNECTION ERROR:

On startup, Terminal gets connected with the Trading Server. In case, if it fails to connect with the Server, following message appears. The connection may fail due to having temporary Server shutdown or some communication channel failures.

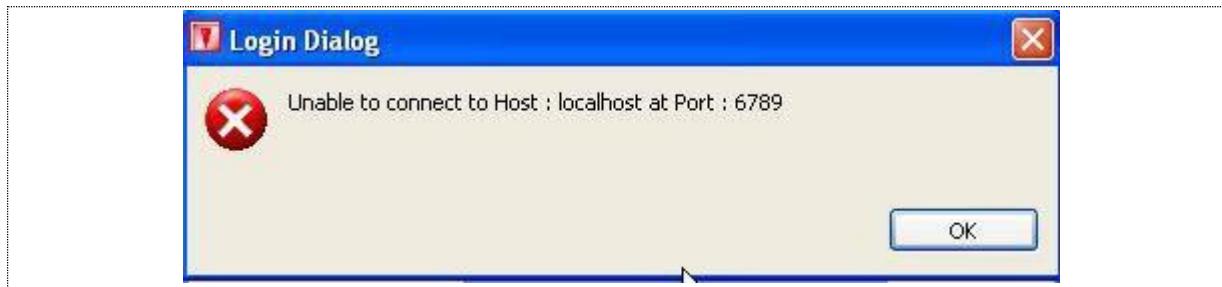

Figure 1: Connection Failed

Login - Login Window

Navigation:

Start Menu > Programs > Softech Trading Terminal > Trading Terminal.lnk

For each application user is provided with a unique user name and password. Each user has a particular user type that determines the level of access a user has to the application. There are three types of users:

Trader User:

Trader has full access to all of the views (except Portfolio View) and can place orders on behalf of different clients associated with the trader.

Client User:

Client also has full access to all of the views (including Portfolio View) but can place orders on behalf of him/her only.

Subscriber View:

Subscriber has limited access to the application. Order related views and functionality is not available for this type of user while all other views are available.

For application login:

For login/access to the application user have to enter two basic information for verification i-e User Id and Password. On successful verification user will logon to the trading terminal.

Figure 2: Login Window

Screen Explanation

Field	Function
User Id	User Id of the user
Password	Password of the user
Save Password	If checked saved password for next logon
Server	Select type of server on which application is available.

**Invalid User Id / Password**

In case system is unable to verify User name and Password, the following invalid login message will appear on the screen.

Figure 3: Invalid User Id or Password

 Application Startup

Navigation:

In case of successful login to the application the below online trading platform will appear. Online trading will help user fast order execution, user friendly interface and real time rates.

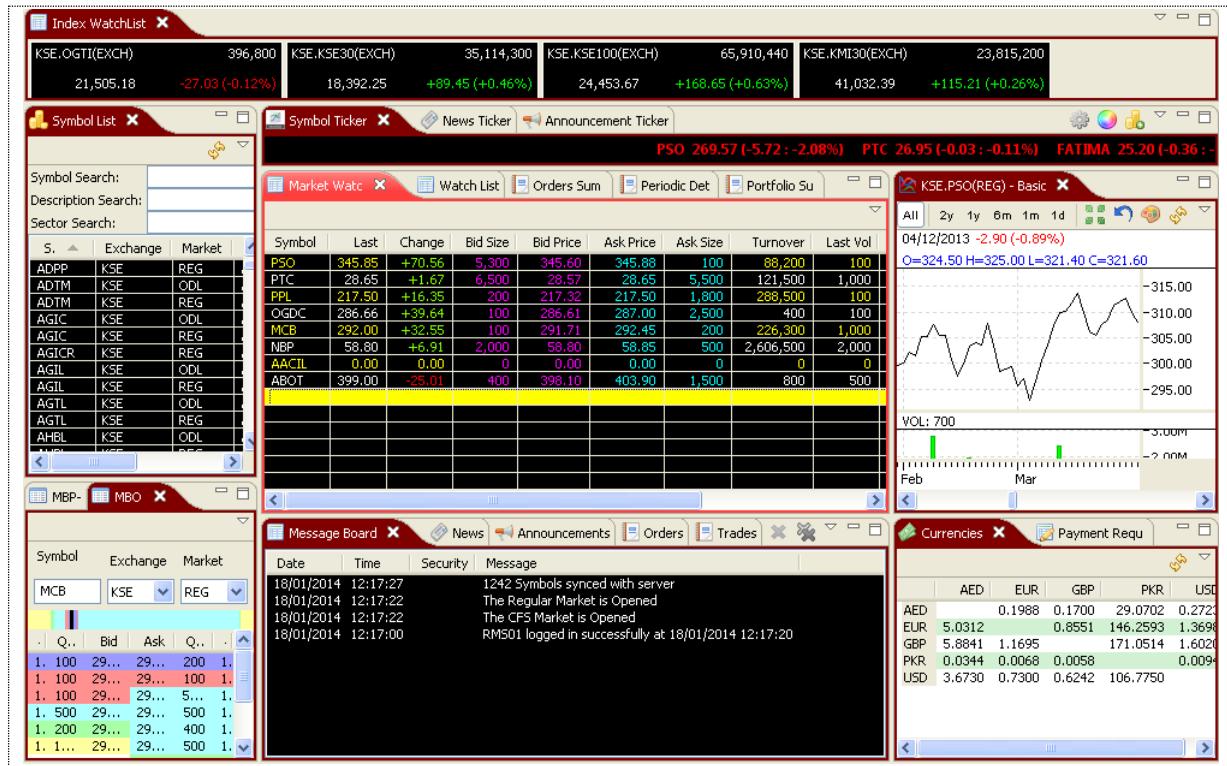

Figure 4: Terminal screen on successful logon

Application Startup - Perspective Selection

Navigation:

When the user logged in successfully to the online trading platform below screen will appear. Click on the icon arrowed in red in the figure 5, select other and the select Trading Perspective from the popup window.

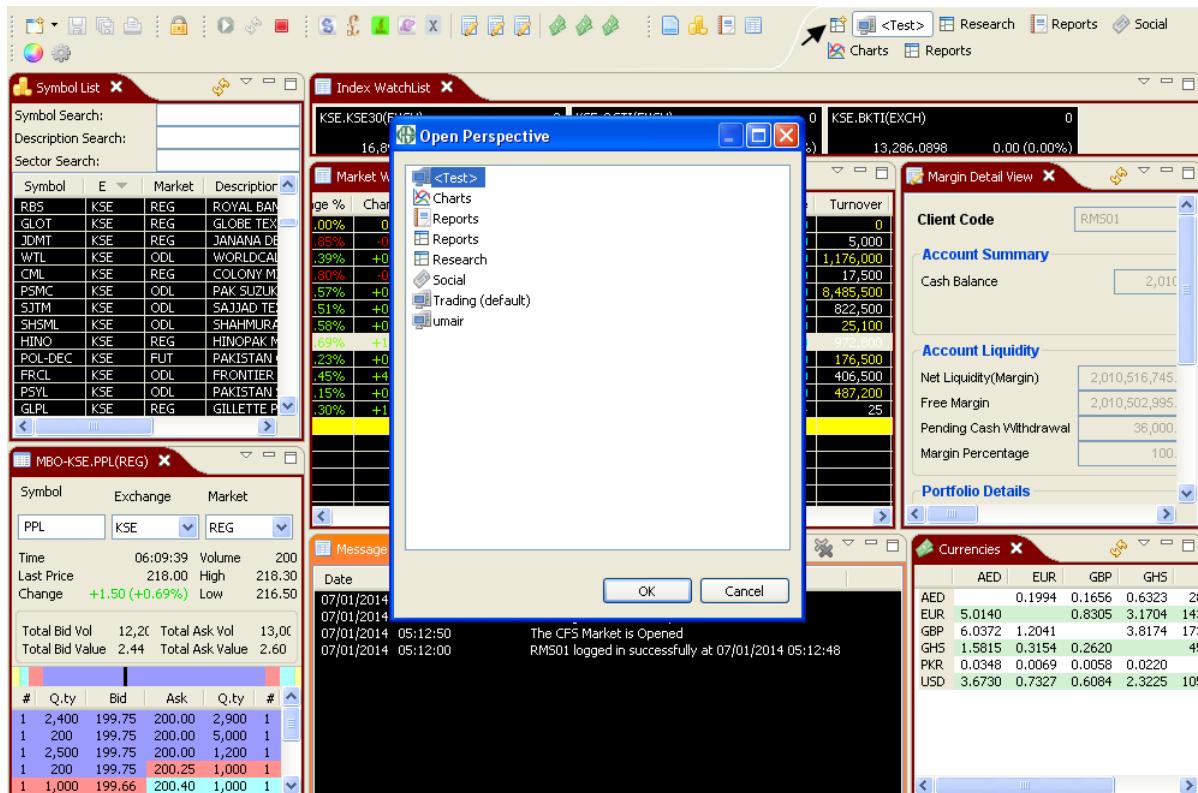

Figure 5: Selecting Trading Perspective

Application Startup – Perspective Selection (cont.)

Following screen appears.

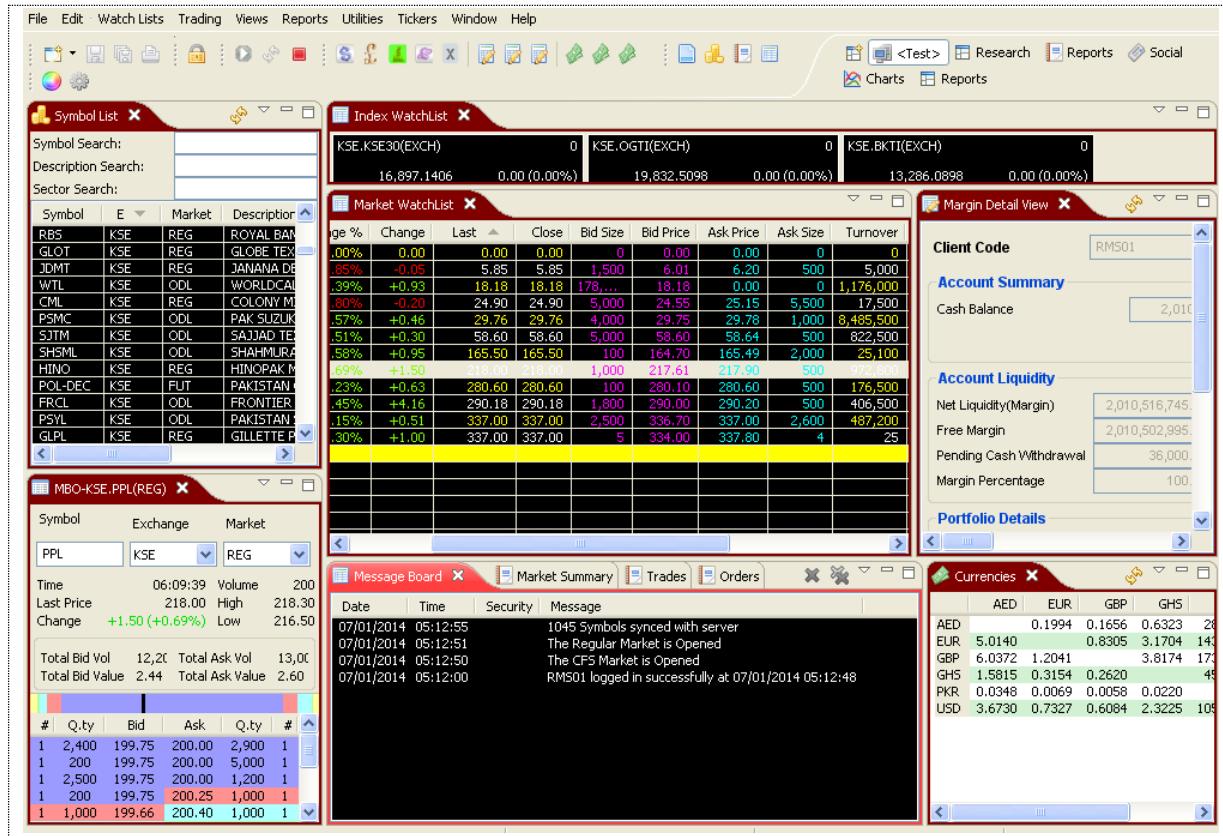

Figure 6: Trading Perspective

File Menu

File Menu - New Wizard - New Watch List

Navigation:

New wizard is used to create new watch list for the trading terminal. Market watch shows current buy and sell market positions for each symbol in real time. Each row shows current market statistics for a particular symbol in a particular market. Below step by step pictorial representation will guide user how to create new watch list wizard.

The screenshot displays the Trading Terminal v2.0.2_15 interface. The main window is titled "Market Watch". It features a "Watch List" tab selected, showing a grid of symbols with their last price, change, bid size, bid price, ask price, ask size, turnover, and last volume. A red box highlights the "Watch List" tab. To the right of the grid is a chart for "KSE.PSO(REG) - Basic" showing price movement from February to March. Below the grid is a "VOL: 700" indicator. At the bottom of the main window is a date range selector from "All" to "1d".

The "New Wizards" window on the left shows a list of options: Close, Close All, Save, Save As..., Save All, Print..., Export..., Properties, and Exit. The "Properties" option is highlighted with a red box.

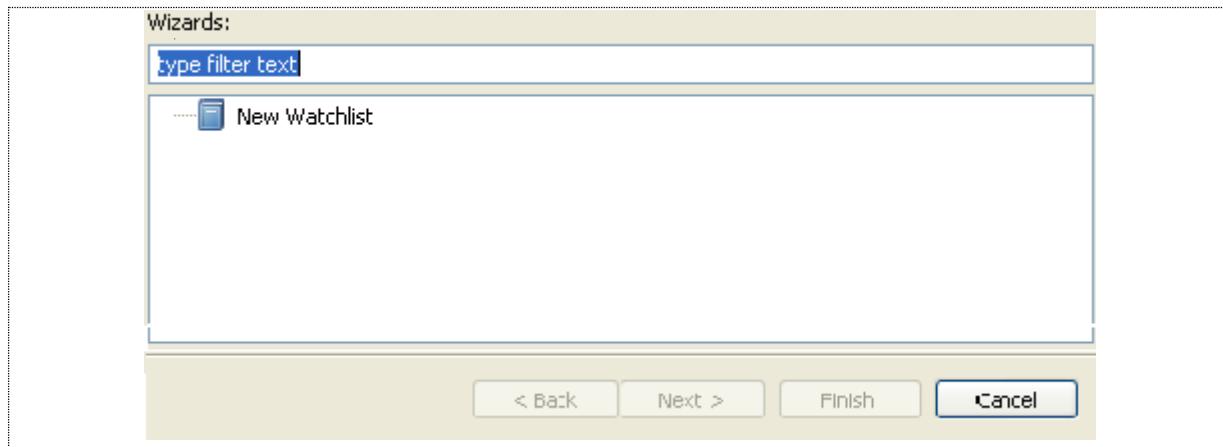

The "Message Board" window shows a log of messages from January 16, 2014, including sync with the server, market opening, and RMS01 logging in.

The "Currencies" window shows exchange rates for AED, EUR, GBP, PKR, and USD.

Figure 7: New Watch List Wizard

File Menu - New Wizard – New Watch List (cont.)

On appearance of this window, please click to check “**New Watch list**” and then Press “**Next**”

When the user pressed next on the previous screen, new general window for assigning name to the watch list will appear. Assign the name to the watch list and press **next**. If you are working in PKR Currency select PKR and marked the default currency so that in future all the working would be done in PKR. Similarly if you are working in some other currency like dollar, Euro, Ghana Cedi etc. please select the desired currency and follow the same above procedure.

Figure 8: New Watch List Wizard – Name and Currency

Screen Explanation

Field	Function
Name	Name of the Watch List
Currency	Currency to be used in the Watch List

Use default currency for security checkbox

Check this checkbox to use the default currency of the security.

File Menu - New Wizard – New Watch List (cont.)

Select the column(s) from the Available columns and press the arrow key encircled in the figure. You can also press  the button to select all columns. You can also re-order the “shown columns” by pressing the   buttons displaying on the right side of the “Shown column”. Press **Finish** to complete the task or if user wanted to add and assign securities to newly created watch list than pressed “**Next**”

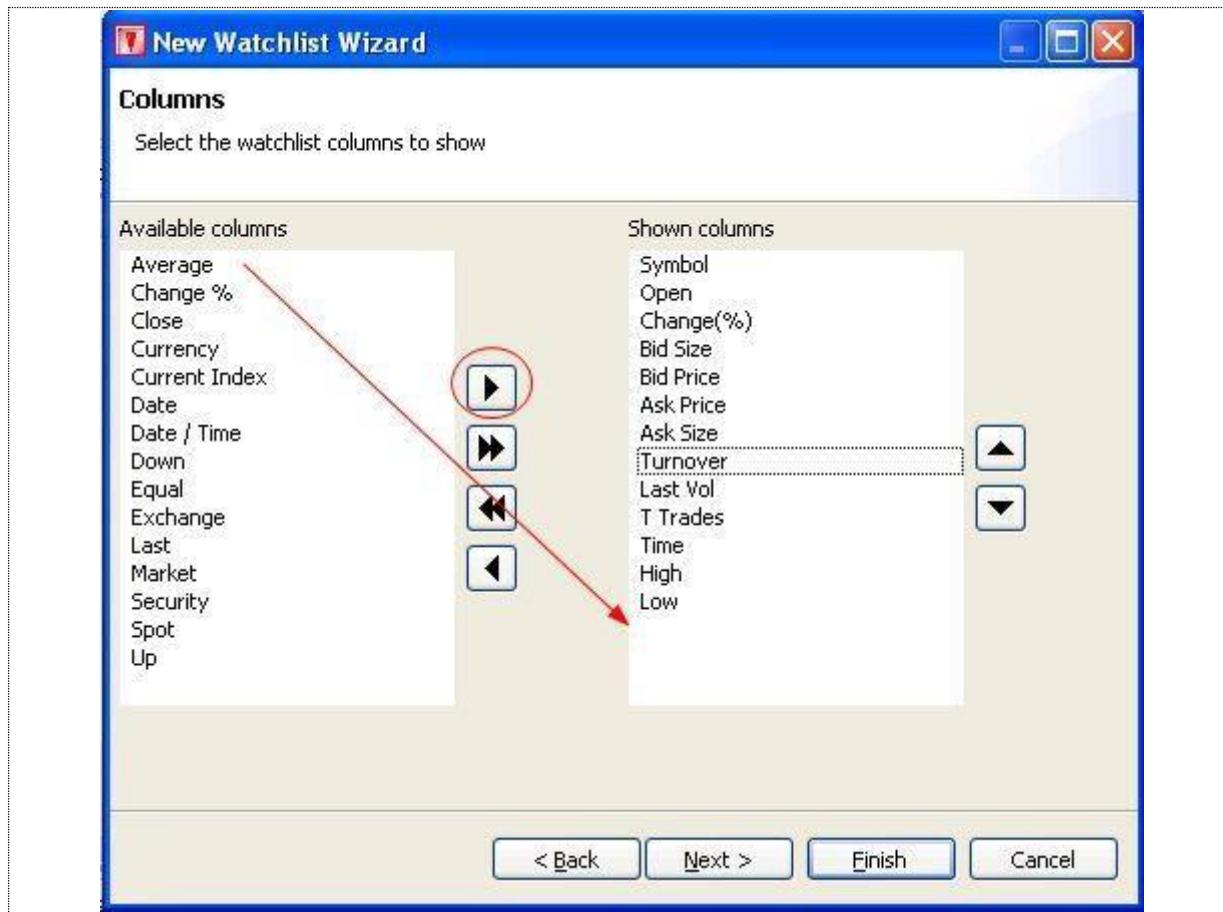

Figure 9: New Watch List Wizard – Selecting Columns

Screen Explanation

Field	Function
Available columns	Columns to be selected.
Shown columns	Selected columns to be displayed with the securities in the Watch List

Screen mentioned in the figure 9 appears. Select the security (ies) from the available list of securities and press the arrow  button encircled in red. You can also re-order the securities by pressing up and down  button displayed on the right side of the "Shown securities". After assigning securities press "Finish" to complete the task.

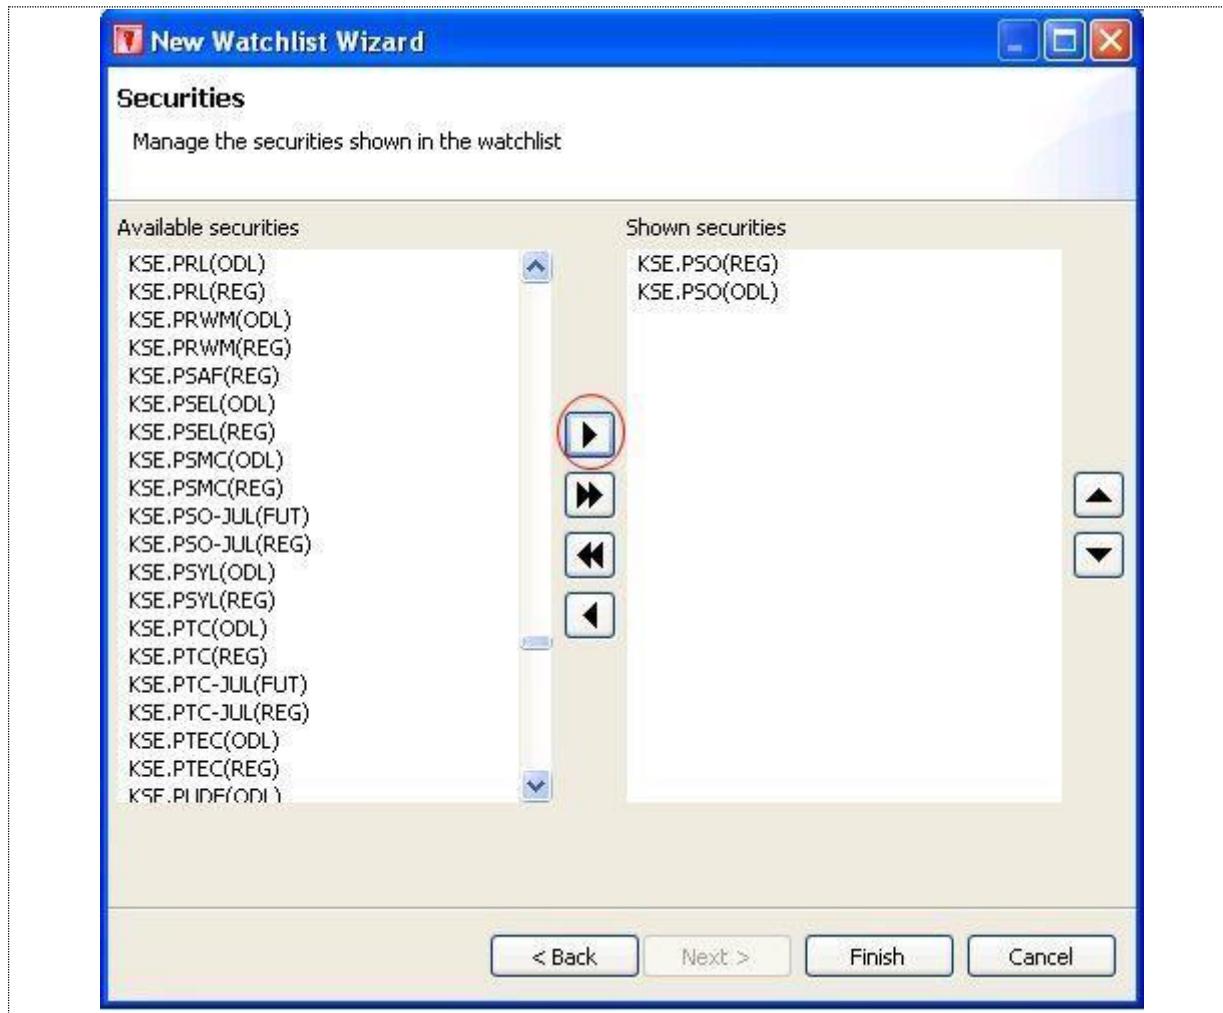

Figure 10: New Watch List Wizard – Selecting Symbols

Screen Explanation

Field	Function
Available securities	Securities to be selected.
Shown securities	Select securities to be displayed in the Watch List.

Once the task will completed below given trading plat form will appeared.

File Menu ->New Wizard >>New Watch List (cont.)

Please watch new created watch list “**My Watch List**” is appearing along with securities that is assigned.

Figure 11: My Watch List

File Menu - Export

Navigation:

This option will allow user to exports the chart data or Trade log on to a specified file. CSV file format will be used.

On selection of “**Export**” following popup dialog appears. On select the “Chart Data” it will highlight the option and pressed “**Next**” to continue.

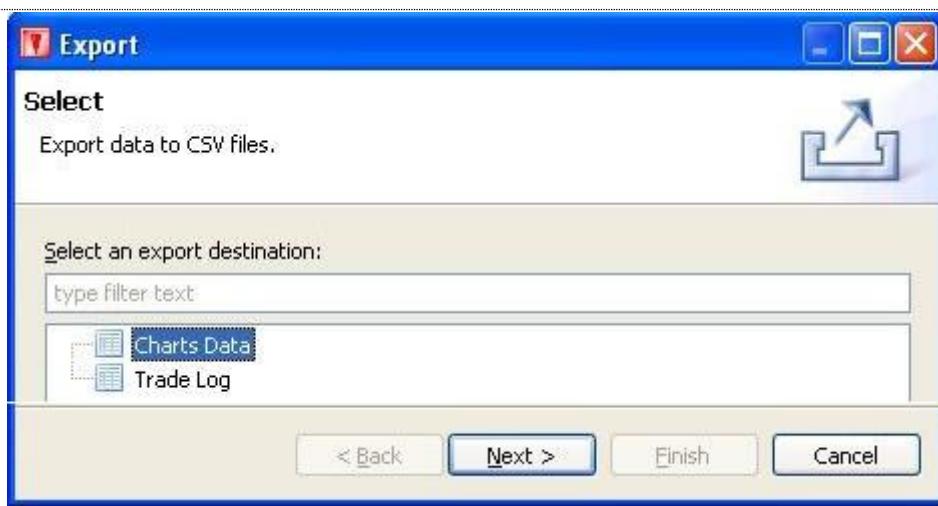

Figure12: Export Dialog

After pressing “**Next**”

File Menu – Export (cont.)

New Screen will appear. User has provided with the two options either Export all or manually.

- Select the securities to export: Highlight the securities and press “**Finish**” to complete the task.

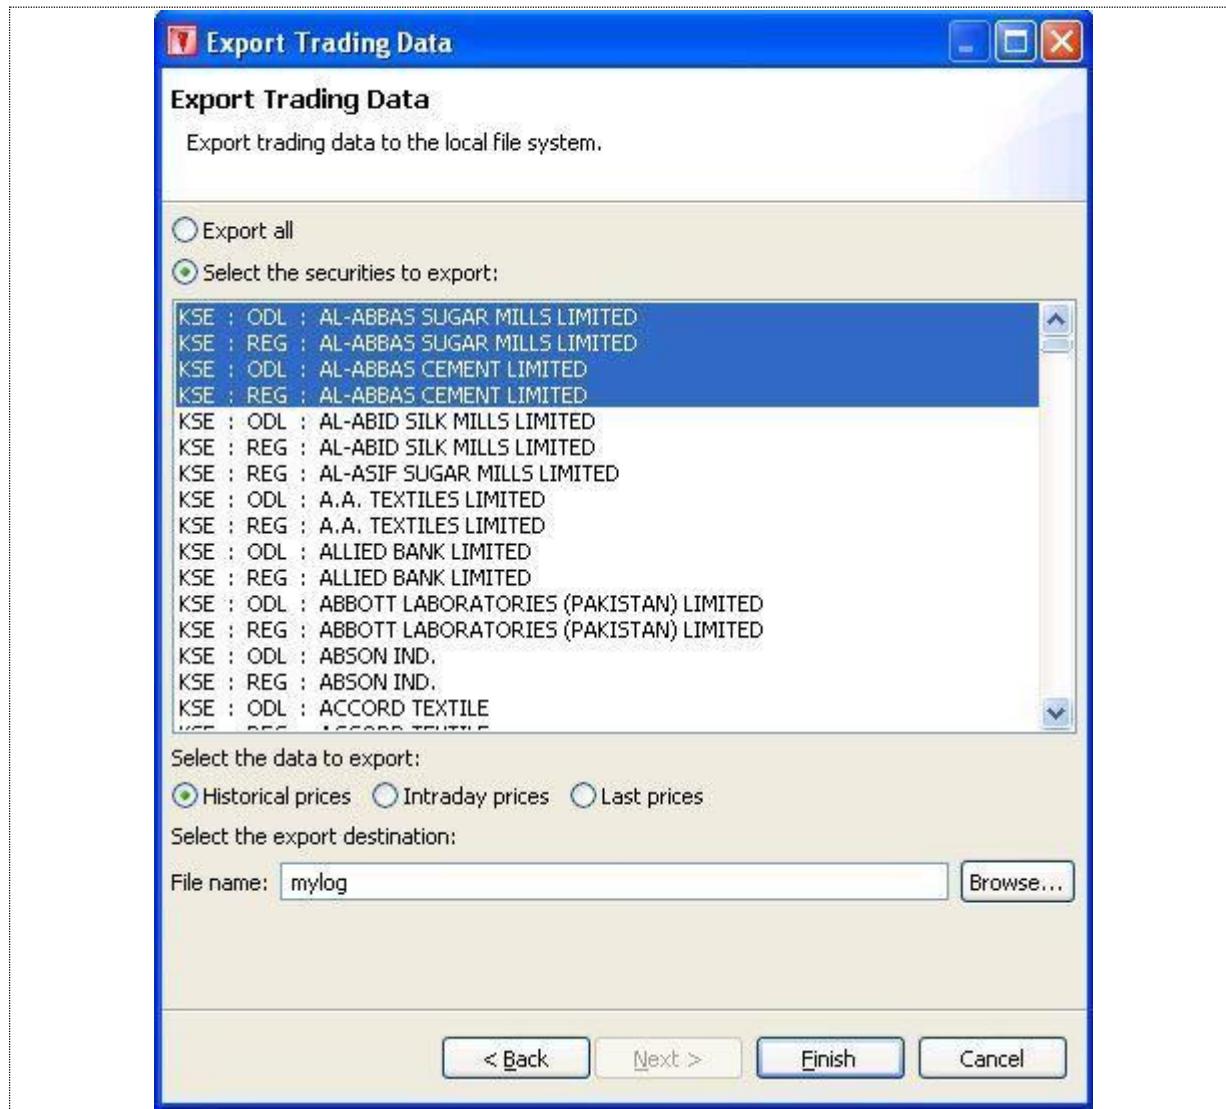

Figure 13: Export Dialog

For historical prices select **Historical prices** combo, whereas select **Intraday prices** to select intraday price, whereas select **Last prices** to select last prices. Click browse specify location and give the filename. Click finish. Open the exported file to check the data.

File Menu – Export (cont.)

In case of export “**Trade Log**” selects “**Trade Log**” from the export dialog. Click Next.

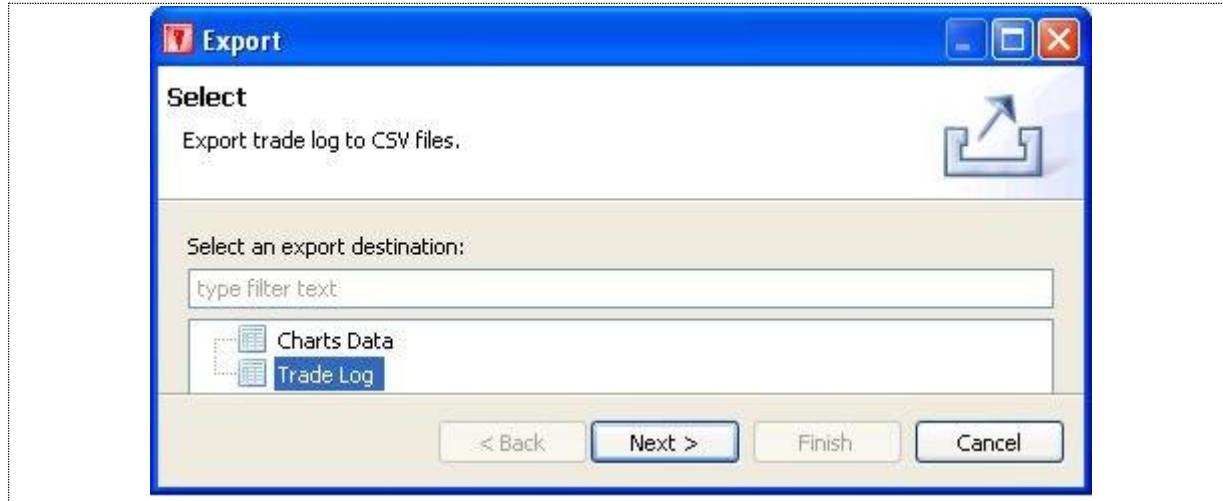

Figure14: Export Dialog

File Menu – Export (cont.)

New Screen will appear. User has provided with the two options either Export all or manually.

 **Select the securities to export:** Highlight the securities and press “Finish” to complete the task.

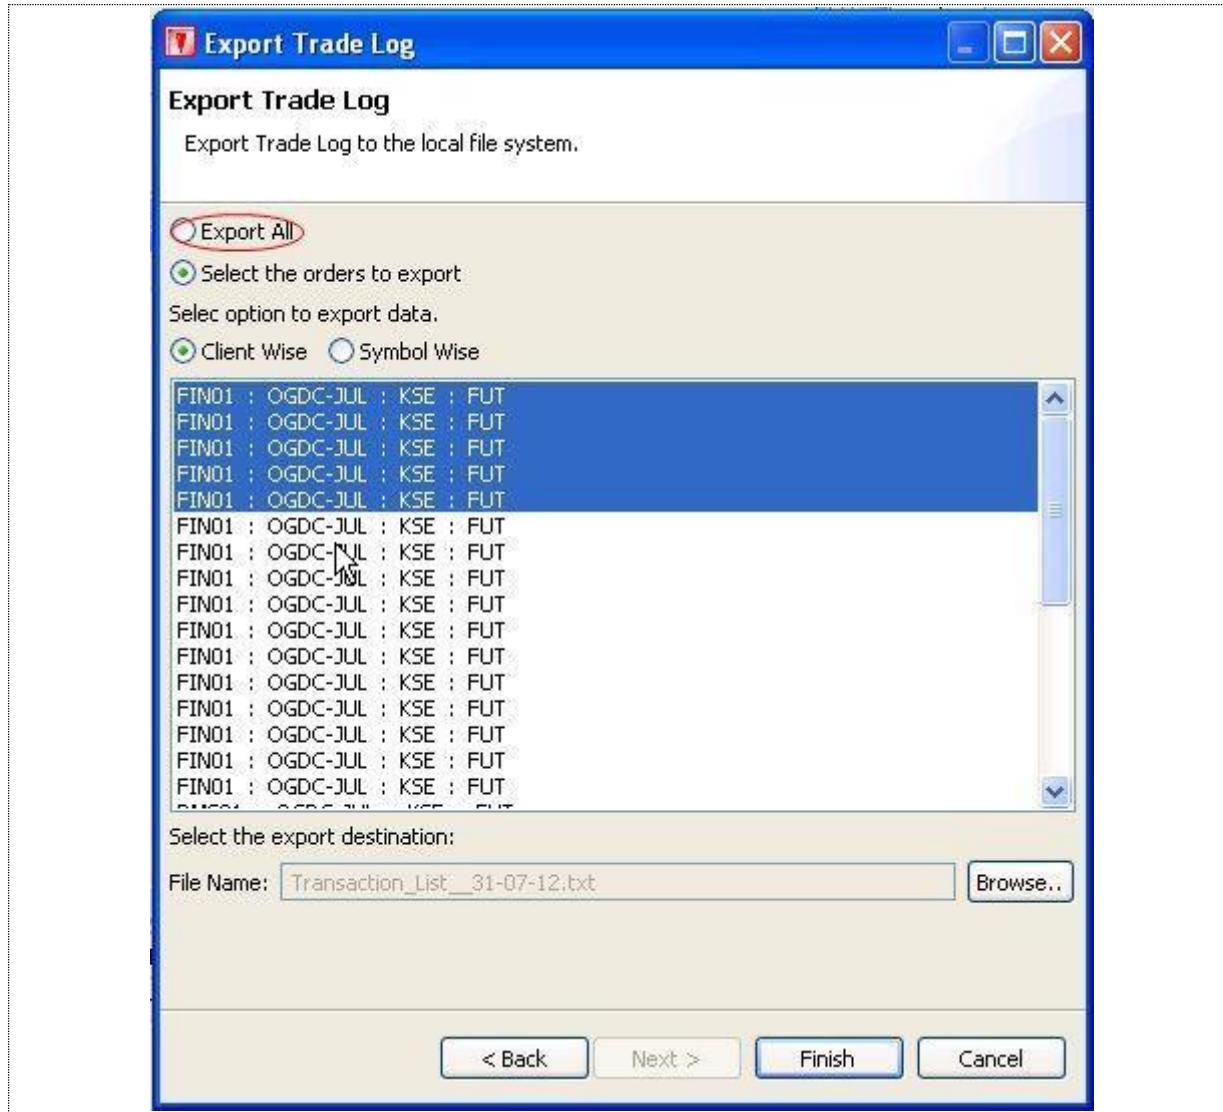

Figure15: Export Dialog

Select “**Export All**” encircled in red to export all securities. Whereas to export selected orders select “**Select the orders to export**”. Highlight the orders to export. Select option to export data i.e. “Client Wise” or “Symbol Wise”. Click on browse and give the filename. Click finish to export the log.

File Menu - Login/Logout

File

Logout

Eclipse terminal Platform has provided with the option to logout from the system from File Menu. Given snapshot will show you the path. Short Key **CTRL + SHIFT + L** are also provided for quick logout without moving to file menu.

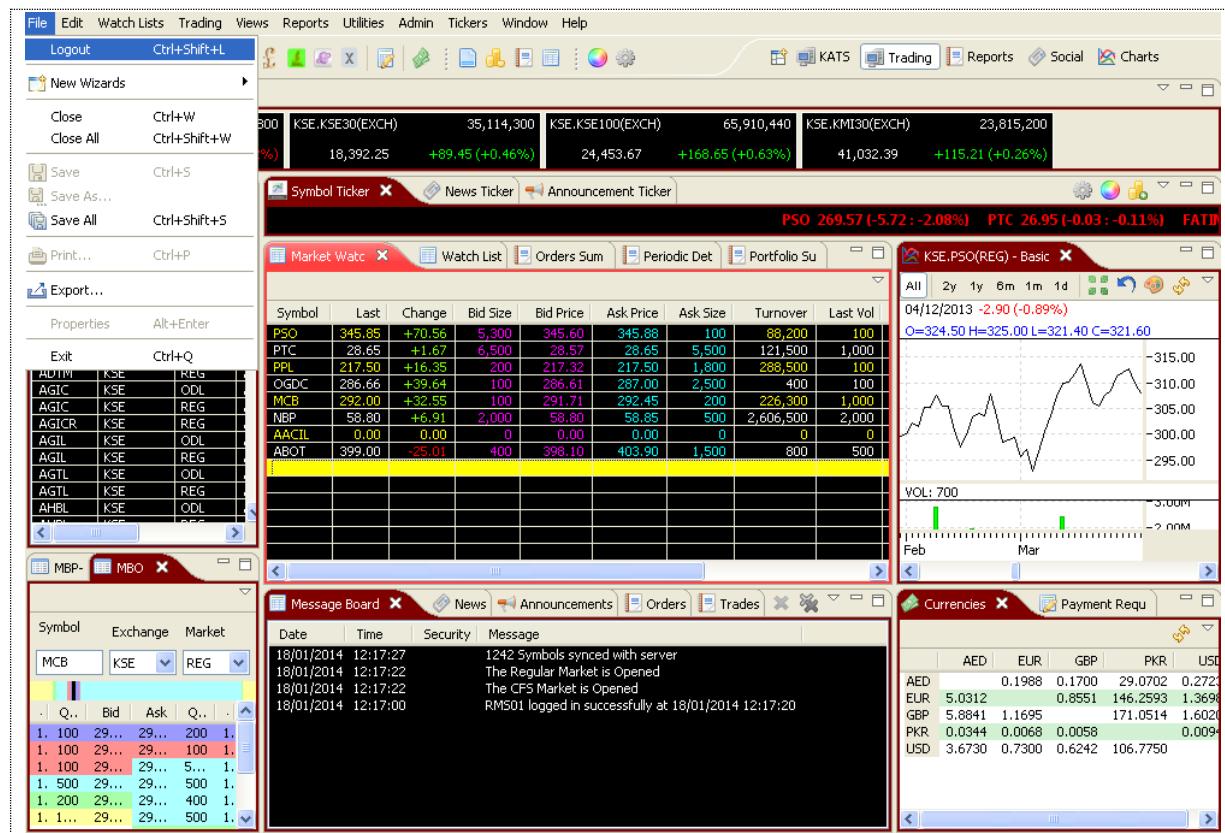

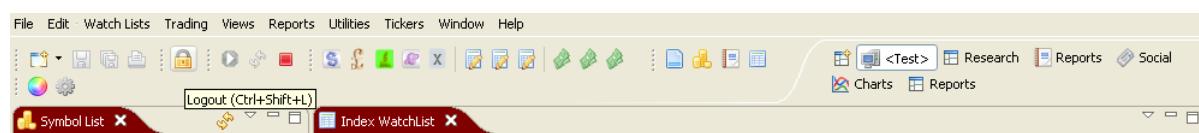

Figure 16: Log in & Log out

Logout from user terminal also provided on the tool bar as shown below

Edit Menu

Edit Manu contain the Option to Change Password and Pin code for the user. There are others option like Cut, Copy, Paste, delete and setting also available. User can either access through Edit menu or through Short Keys. List of all short keys are available at the end of the document.

Eclipse User Terminal has provided with the facility to change Password as per the user discretion. Short Cut key is **Ctrl + Alt+ P** for change password request. Password policy follows our back office AMS (authority Manage system). After successful change, new password become effective immediately.

Please Follow the Screen

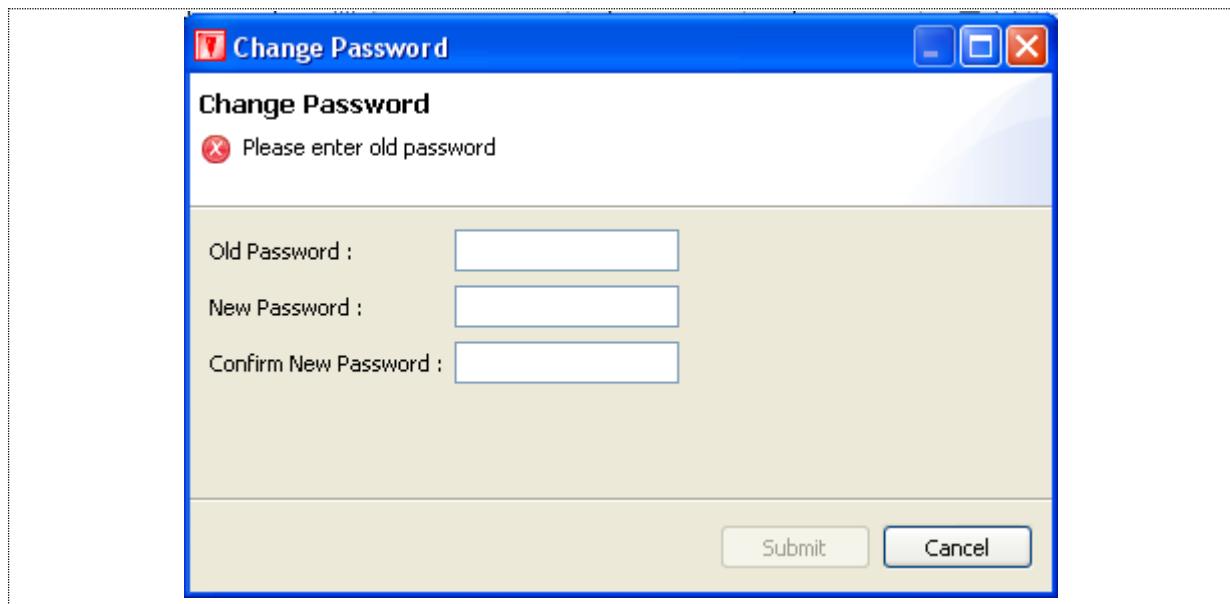

Figure 17: Change Password

Field	Function
Old Password	Enter the Current Password
New Pass word	Enter new password
Confirm New Password	Enter new password. It should be same. If enter wrong mismatched error will appear

Change PIN CODE:

Navigation:

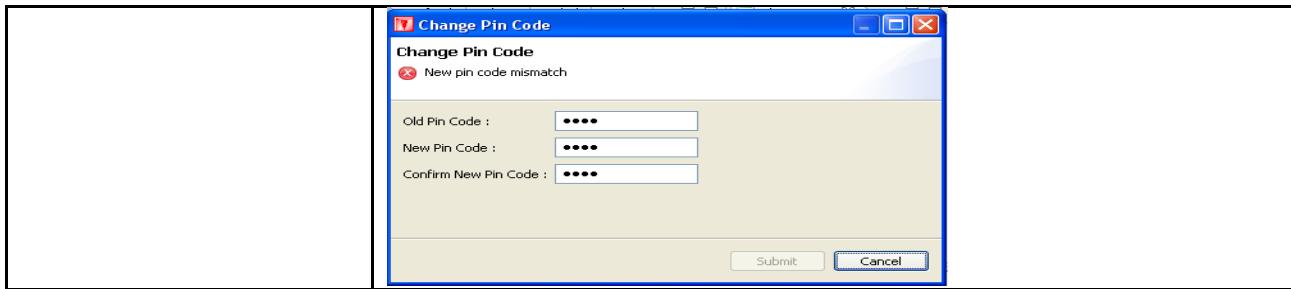

Change of PIN Code option also available along with the Password Change Option. **Ctrl + Shift + P** short cut available for pin code change.

Figure 18: Change Pin Code

Field	Function
Old Pin Code	Enter the Old Pin code
New Pin Code	Enter new Pin Code
Confirm New Pin Code	Enter new pin Code. New pin code and Confirm New Pin Code If enter wrong mismatched error will appear

Watch Lists Menu

Most of the Watch Lists are stock feed based and have similar customization options. User can choose symbols to be shown in the Watch List. User can select different columns to be shown on the Watch List from a list of columns and can also arrange these columns in some desired order. User's current settings for different view attributes, layout and positioning are saved on application exit and persist even after application has been closed. These settings are restored next time application is started.

Figure 19: Watch Lists Menu

Watch Lists Menu - New Watch List

Navigation:

Watch Lists Menu > New Watch List

New watch list is same as File > New Wizard > New Watch List. For details refer to File Menu - New Wizard – New Watch List. Details are explained in 1.3.1.

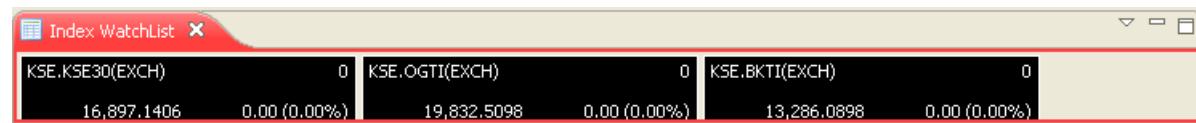

Watch Lists Menu - Index Watch List

Navigation:

A stock index is a method of measuring the values of a section of a stock market. It is computed from the prices of a selected stock.

Drag and drop securities from the Market Watch List onto the Watch List.

Indexed values are displayed with the securities along with the change percentage.

Watch Lists Menu - Market Watch List

Navigation:

Once the market watch list is created and during creation if user haven't select the securities to be displayed. Than drag and drop option is also available. Drag the required security showing in the symbol list and drop it to the market watch.

Figure 63: Preferences – Notification Setting – Orders and Trades

Screen Explanation

Checkbox or Field	Function
Sound Alert Setting – Enable order confirmation	Plays a sound when an order is placed
Sound File Name	Name of the sound file
Sound Alert Setting – Enable trade confirmation	Plays a sound when a trade is executed
Sound File Name	Name of the sound file
Notification Alert Setting – Enable order confirmation	Enables confirmation of locked symbol(s)
Notification Time	Order confirmation is updated to the client in the number of seconds specified
Block on open	Blocks the Alert message when order confirmation is open
Notification Alert Setting – Enable trade confirmation	Enables confirmation of trade
Notification Time	Trade confirmation is updated to the client in the number of seconds specified
Block on open	Blocks the Alert message when trade confirmation is open

Popup Dialog Setting – Enable order confirmation	Opens a popup dialog when an order is confirmed
Popup Dialog Setting – Enable trader confirmation	Open a popup dialog when a trade is confirmed

Window Menu – Preferences (cont.)**Plug-in – Report**

This preference is used to change the view of Reports. User can view Reports in three different Fonts, Small, normal and Large. Follow the navigation and select the font size and apply changes.

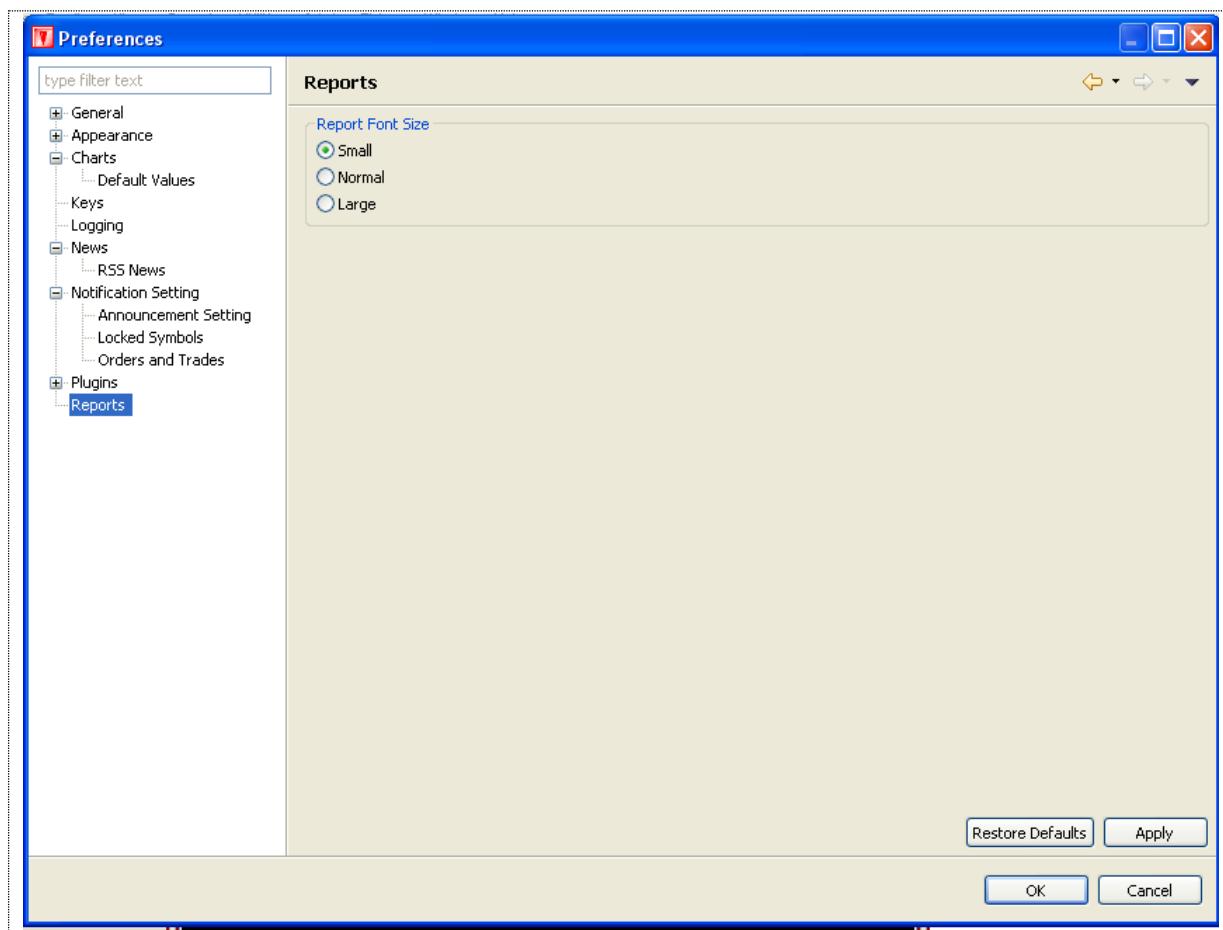

Figure 64: Preferences – Report

Screen Explanation

Checkbox or Field	Function
Small	If selected Small, Report will be displayed in small font size
Normal	If selected Normal than report will be displayed in normal font size

Large	If selected Large than , than report will be displayed in large font size
Apply	When pressed changes will be applied
Restore Default	If user wanted to continue with the default setting than

 Help Menu

 Help Menu - Install New Software

Navigation:

Terminal provides a feature to update existing software from the terminal website. Install New Software is one time effort and is not required if it is already configured.

In order to download software updates, you have to verify the Auto Update Server URL (<http://www.serverurl.com/updateSite/>) is configured in your software. At the place of server URL give URL of the server where updates are available.

Click on work "Work with the list of software sites".

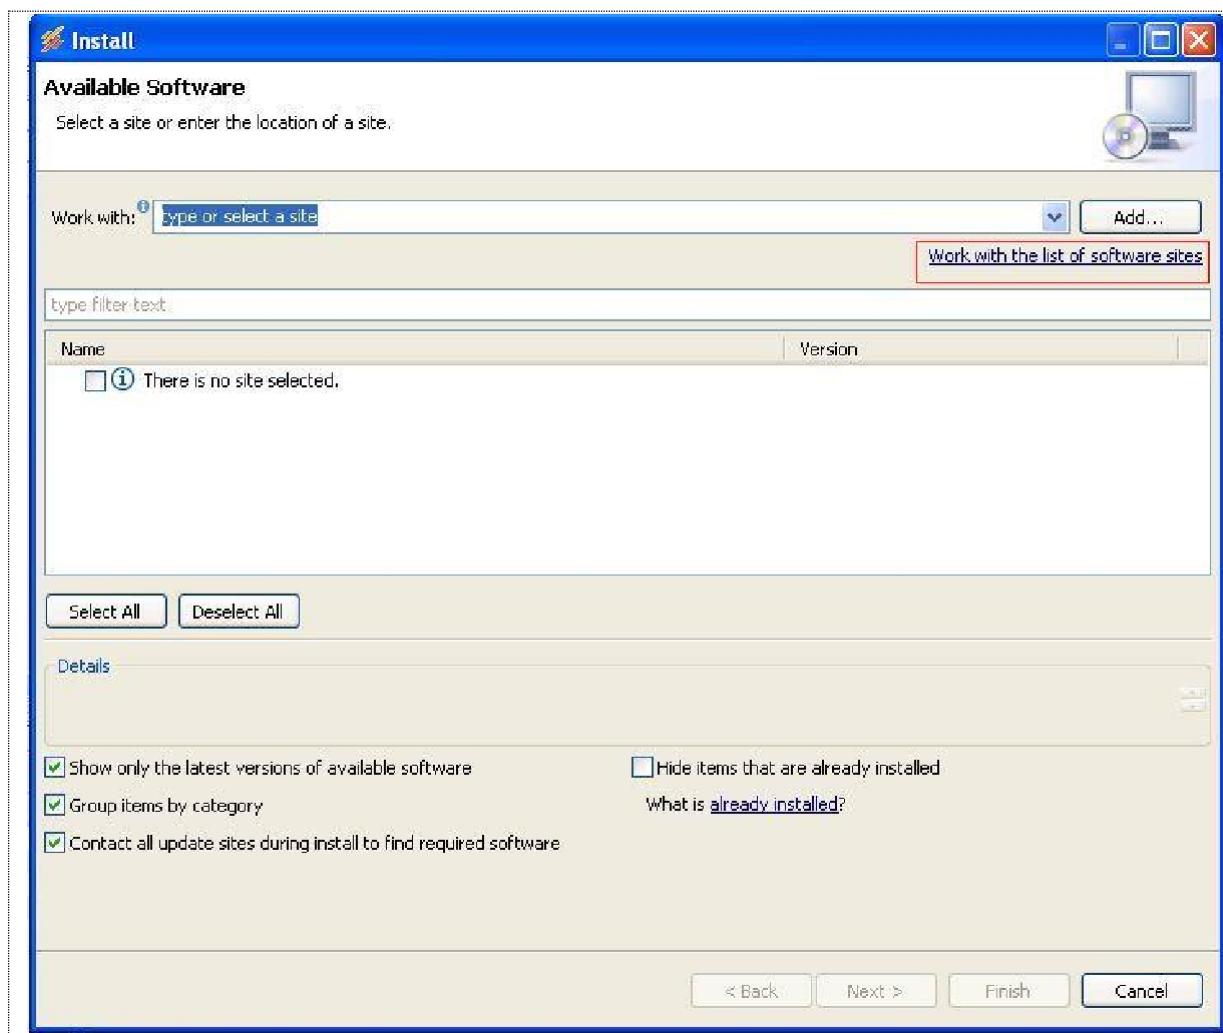

Figure 65: Install New Software

Help Menu – Install New Software

Following window appears.

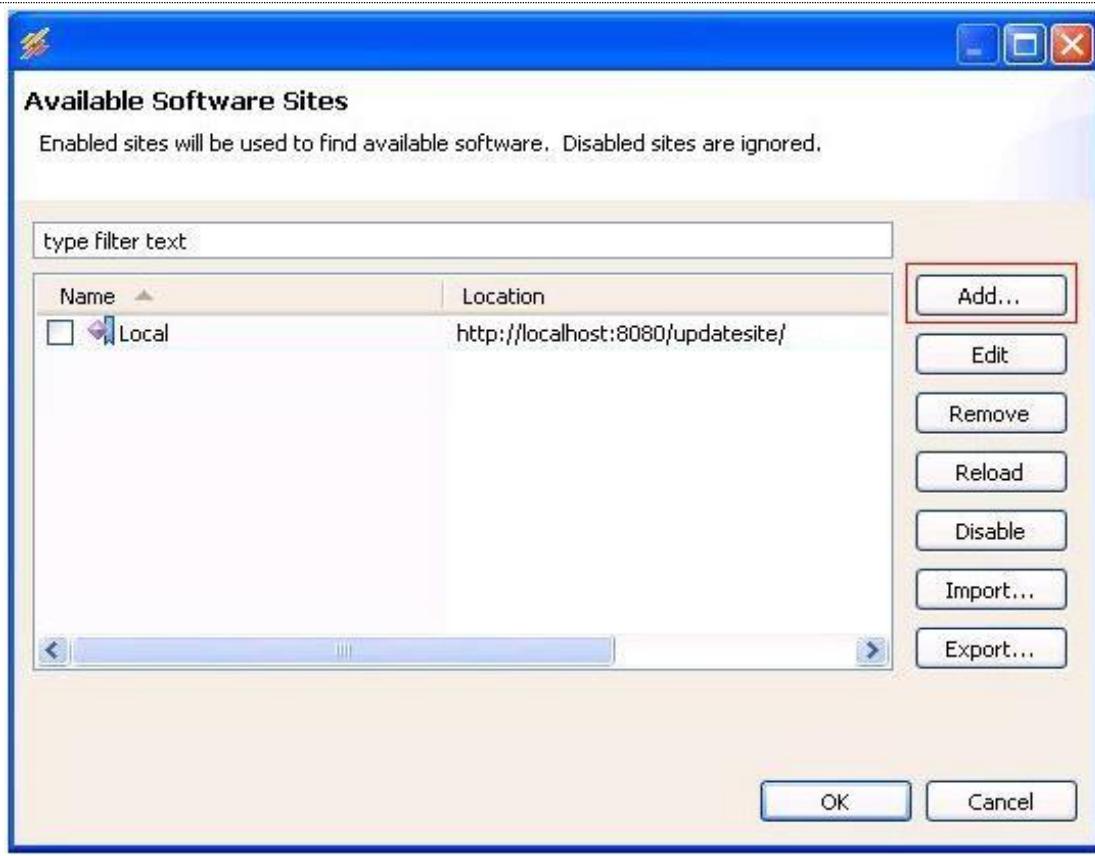

Figure 66: Add Software Site

Click on “Add” button to add new software site or click on edit button to edit existing software site. Following window appears when you click on “Add” button.

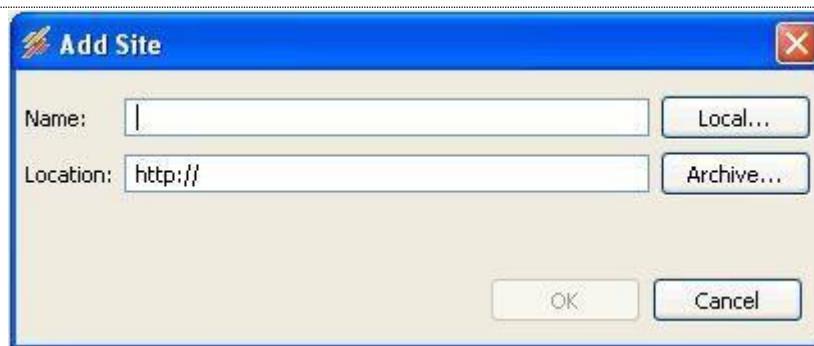

Figure 67: Install New Software

Screen Explanation

Checkbox or Field	Function
Name	Give name for the software site
Location	Give the location of the software site.

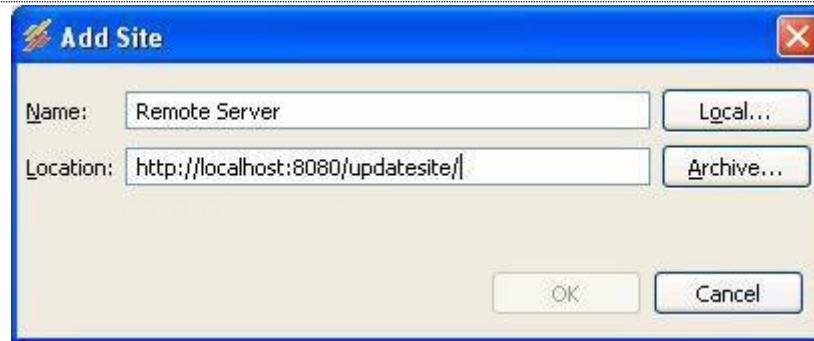

Help Menu – Install New Software

Figure 68: Give Update Site Location

After giving information press OK button.

If a software site is updated, press reload button. It will check whether the software site is available.

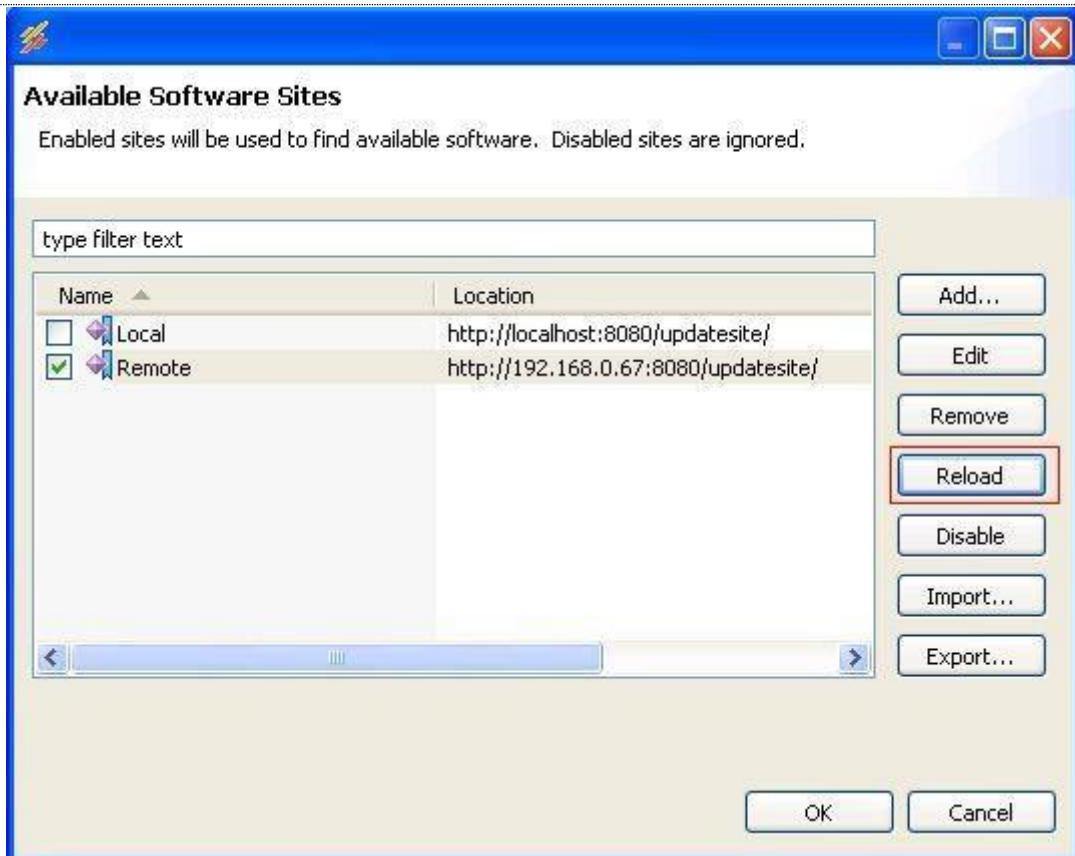

Figure 69: Reloading Software Site

Help Menu – Install New Software

If software site is unavailable following error appears.

Figure 70: Software Site Unavailable

If there is a success message, you have configured the URL and you are ready to download the software updates.

 **Help Menu - Check for Updates**

Navigation:

If the updates will available then you will see the following view. Complete procedure is mentioned below for updating of new available updates.

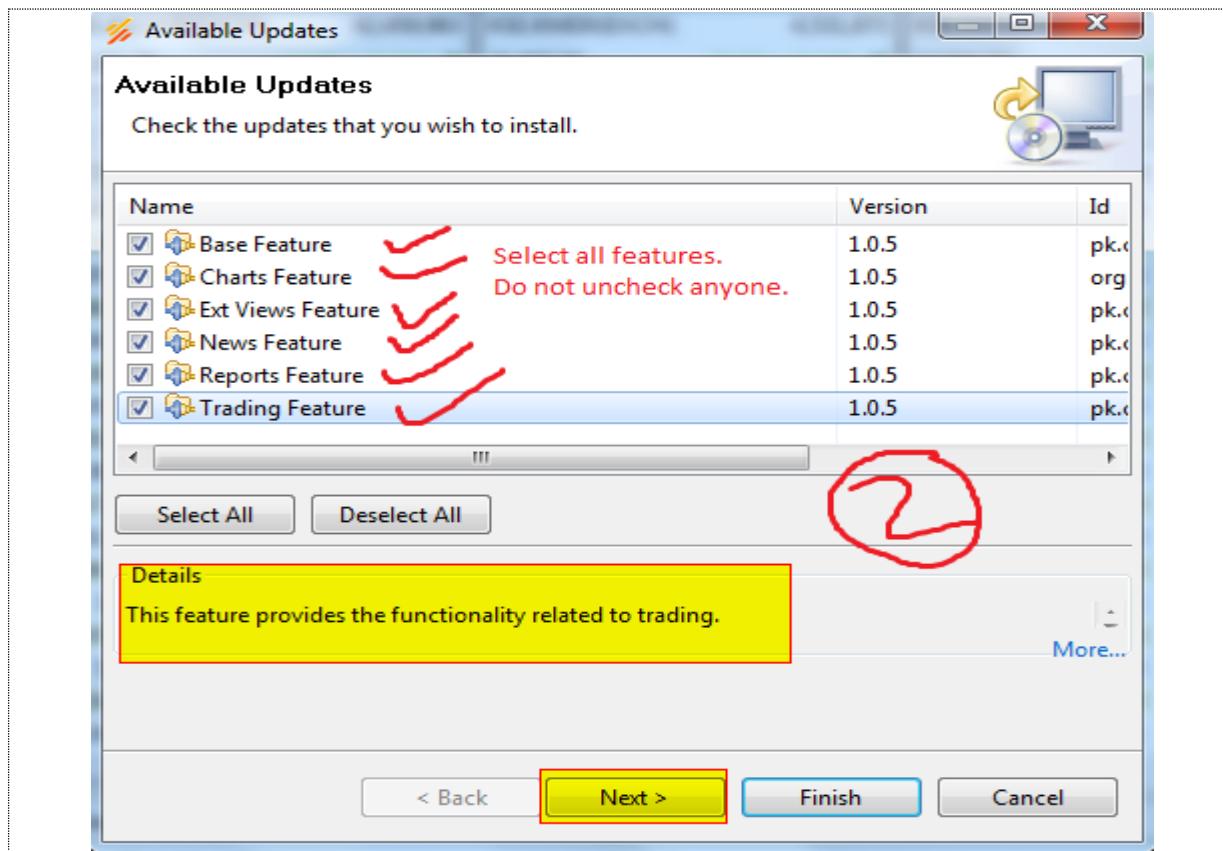

Figure 71: Update Software

Screen Explanation

Checkbox or Field	Function
Base Feature	A terminal feature to be updated
Charts Feature	A terminal feature to be updated
Ext View Feature	A terminal feature to be updated
News Feature	A terminal feature to be updated
Reports Feature	A terminal feature to be updated
Trading Feature	A terminal feature to be updated

Help Menu – Check for Updates (cont.)

Following window appears on pressing “**Next**” button.

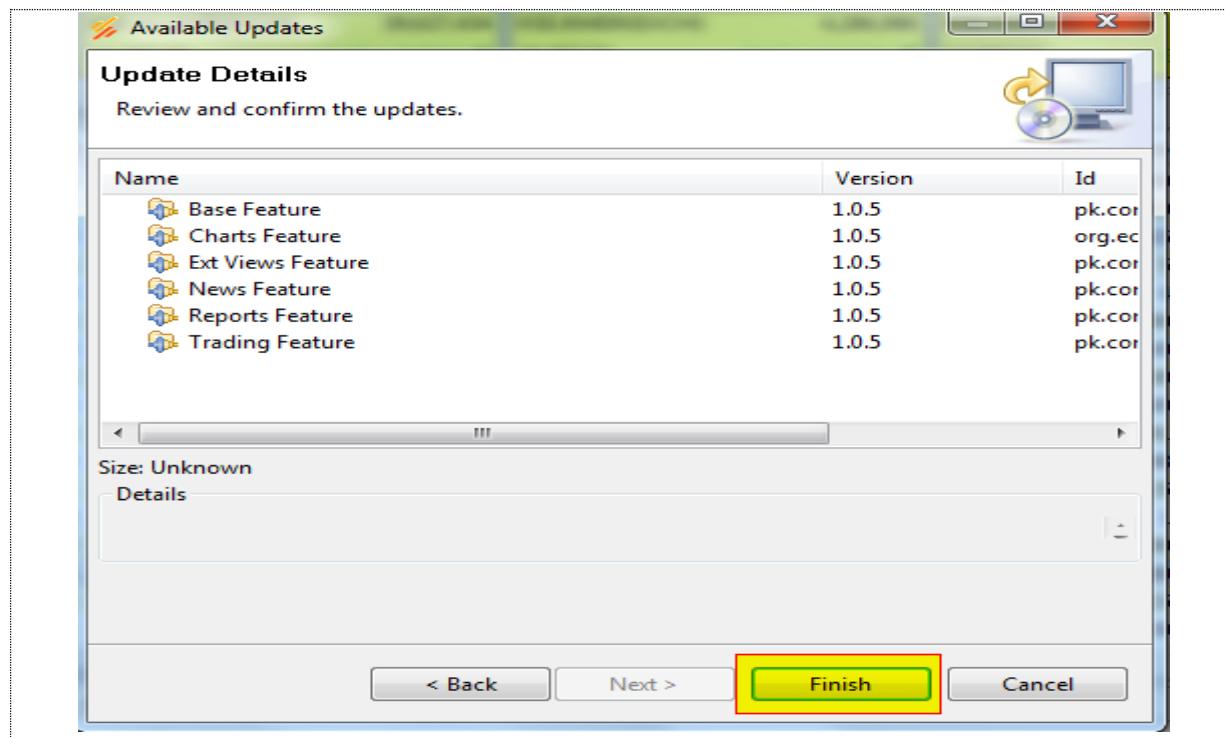

Figure 72: List of New Software Available

Now your software starts downloading updates from server you have configured in previous step.

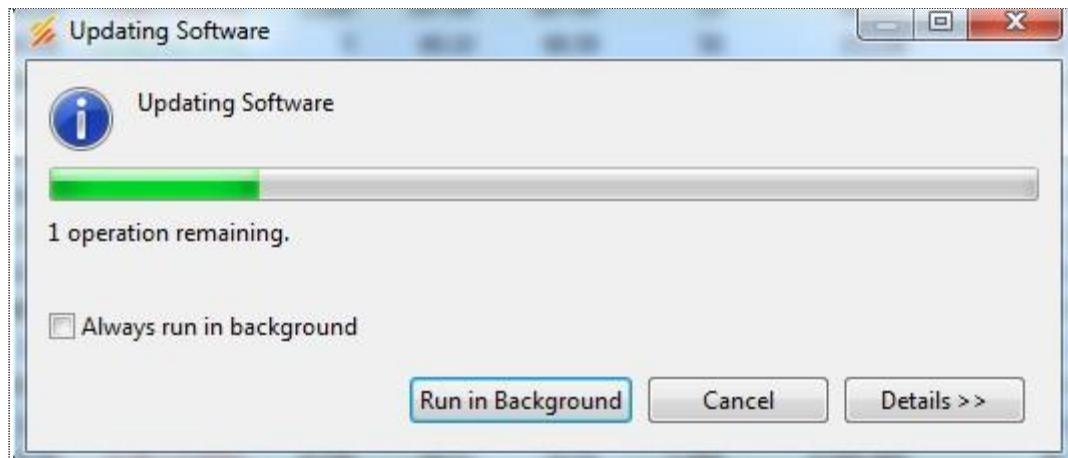

Figure 73: Updating Software

Note: Sometime it shows an error message while downloading the updates due to your internet connection speed but be patient and try it again (**Check for updates**) because ultimately it will download updates.

After downloading updates it will show warning message. (**Just ignore it**)

Help Menu – Check for Updates (cont.)

Figure 74: Warning – Unsigned Content

Now your software is updated. You have to restart terminal in order to view changes.

Figure 75: Restart Application

After restarting the terminal, updates will be incorporated in your terminal. To verify it again check for updates, you will see the following message that no updates were found.

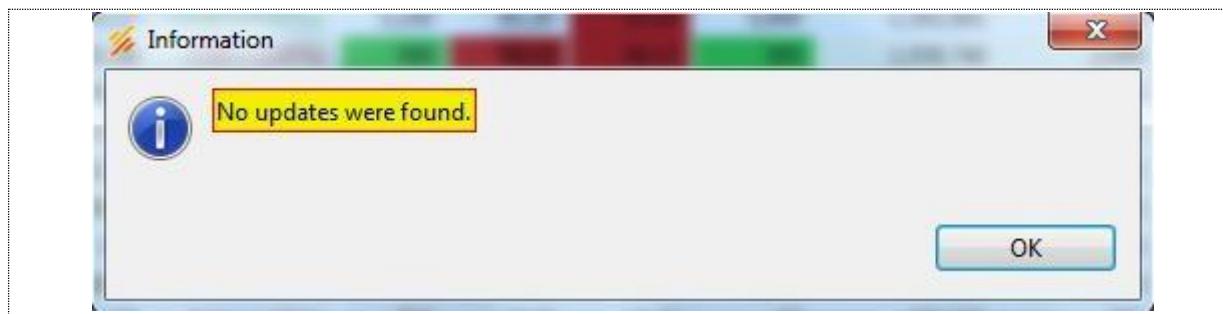

Figure 76: No Updated Available

Charts Perspective

Navigation:

Charts perspective is a complete perspective just like Trading Perspective. It enables user to view different statistics for analysis. Along with the plotting of graphs and charts, there are indicators tools and patterns available for analysis purpose.

Figure 77: Open a Chart

Chart will be displayed. This chart provides price statistics along with time. There is also a bar chart in the bottom that displays volume statistics along with time.

You can change the type of the chart by selecting the line displayed in the line chart. Right click it and click properties. Following popup window appears. Select Type of chart as Line, Bars, Candles or Histogram Area.

Charts Perspective (cont.)

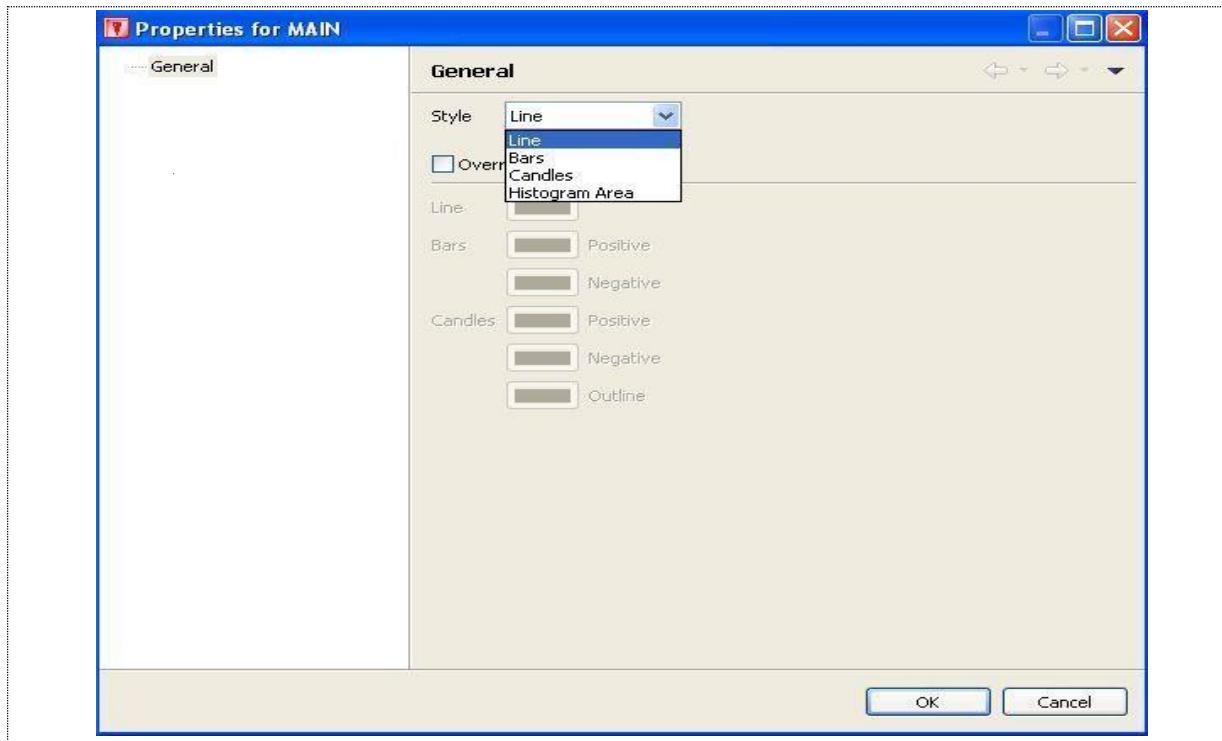

Figure 78: Change Type of Chart

You can also override the color theme by checking “Override color theme” and select color from the color palette for line bars or candles.

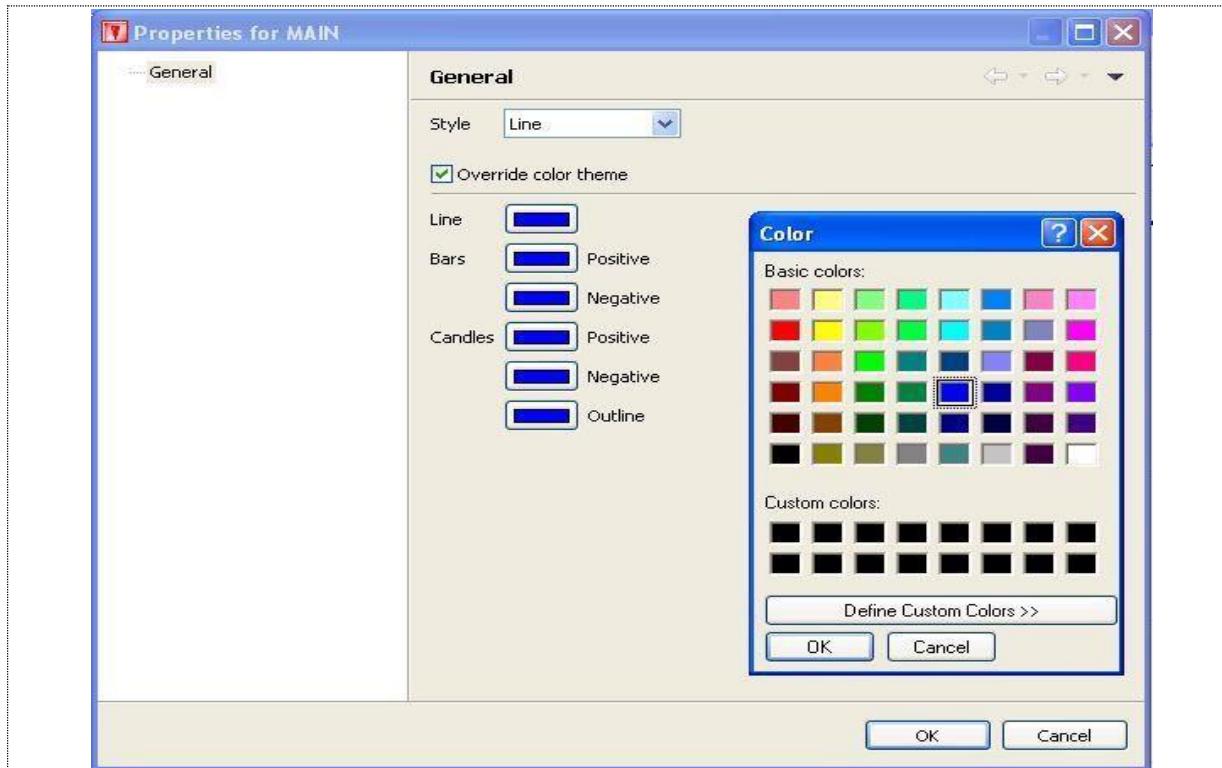

Figure 79: Change Type of Chart

You can view the charts for certain time duration by selecting history chart or intraday chart from the top right of charts view as encircled in the figure 71.

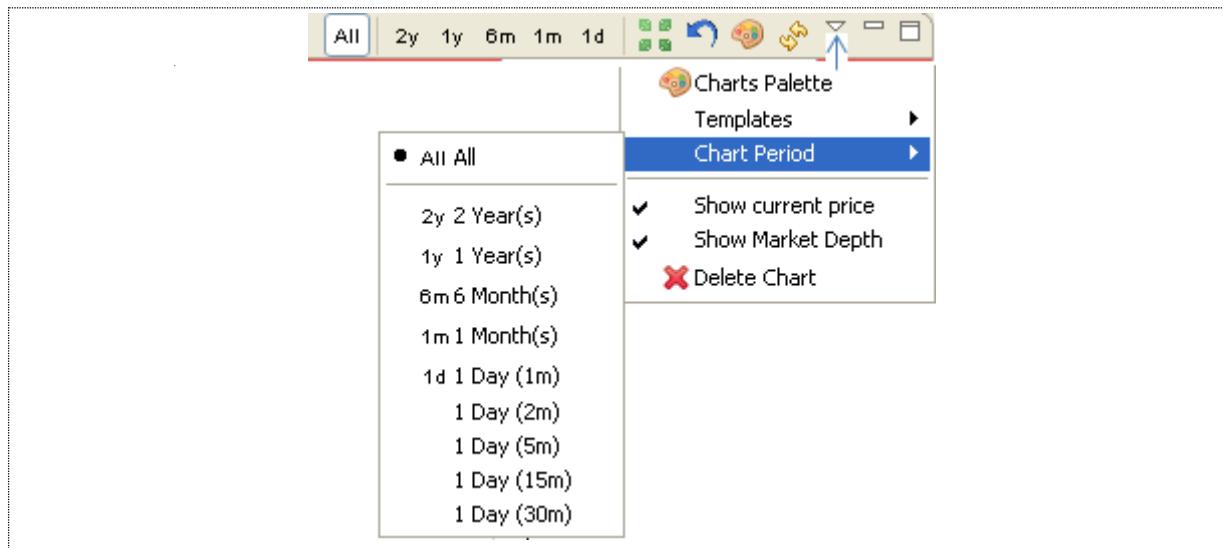

Figure 80: Change Type of Chart

Screen Explanation

Field	Function
All	Shows complete history
2 year	Shows 2 year data
1 year	Shows 1 year data
6 month	Shows 6 month data
1 month	Shows 1 month data
1 day	Show intraday chart
Show current price	Shows current price in the chart
Show Market Depth	Show Market Depth in the chart
Delete Chart	Deletes the chart

Charts Perspective - Top Indicators

Top Indicators provide different statistics as Bollinger Bands, Linear Regression, Moving Average, Trend Channel and Typical Price.

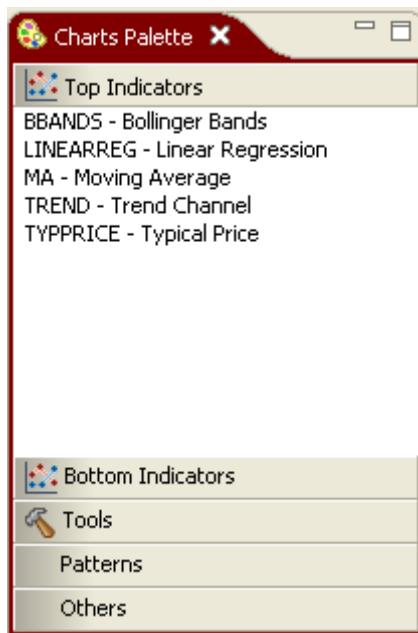

Figure 81: Top Indicators

To view a top indicator click on the indicator from the Charts Palette drag it and drop it onto the Chart view. Following window appears. In figure 72 and figure 73 Bollinger Bands is configured.

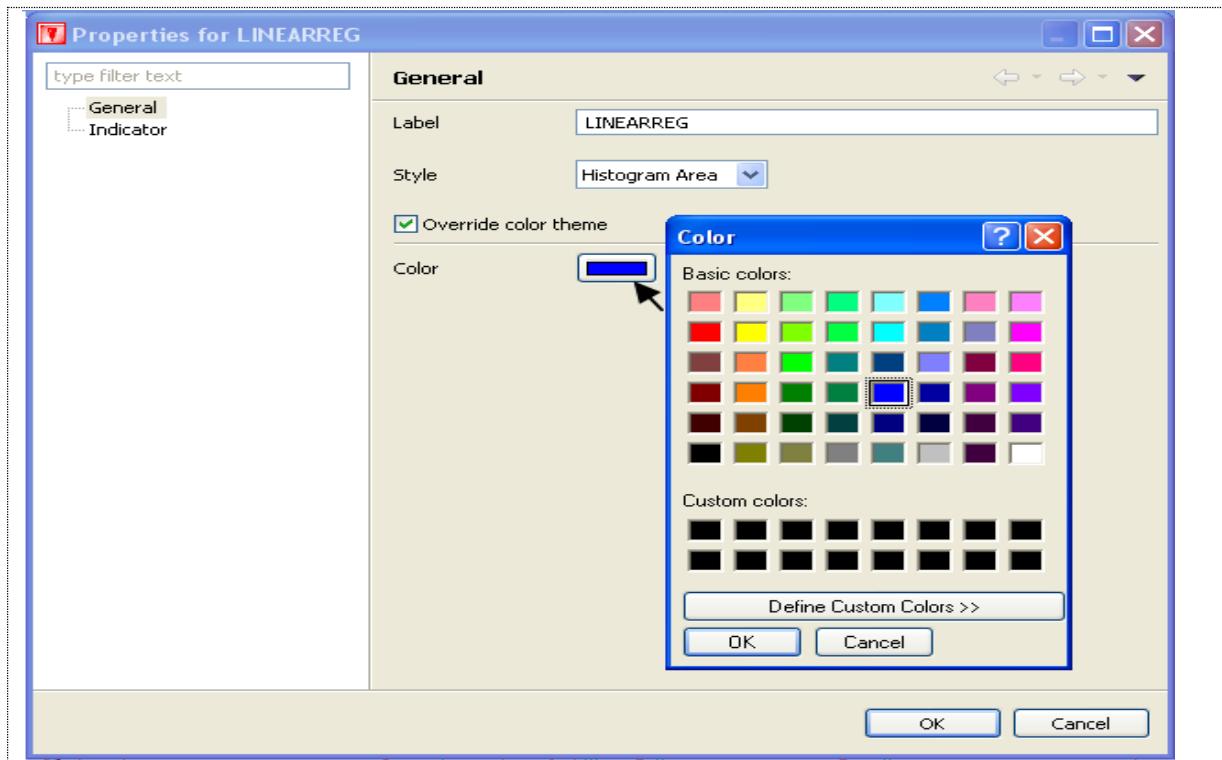

Figure 82: Bollinger Bands - General

Charts Perspective – Top Indicators (cont.)

Provide label in the label field. You can also check the “Override color theme” checkbox if you want to change the color of the chart.

You can also change the indicators by clicking the indicators link from the tree.

Figure 83: Bollinger Brands Indicators

Screen Explanation

Field	Function
Input Field	Input field can be either Close, High, Low, Open or Volume.
Period	Select the period
Upper Deviation	Select upper deviation
Lower Deviation	Select lower deviation
MA Type	Select MA Type
Upper Line Style	Select upper line style
Middle Line Style	Select middle like style
Lower Line Style	Select lower line style

Charts Perspective – Top Indicators (cont.)

Following chart appears.

Figure 84: Bollinger Brands Indicators

Similarly other Top Indicators like Linear Regression, Moving Average, Trend Channel and Typical Price can be displayed.

Charts Perspective - Bottom Indicators

Bottom Indicators can display different statistics as Chaikin A/D Line, Chaikin A/D Oscillator, A/D Movement Index, etc.

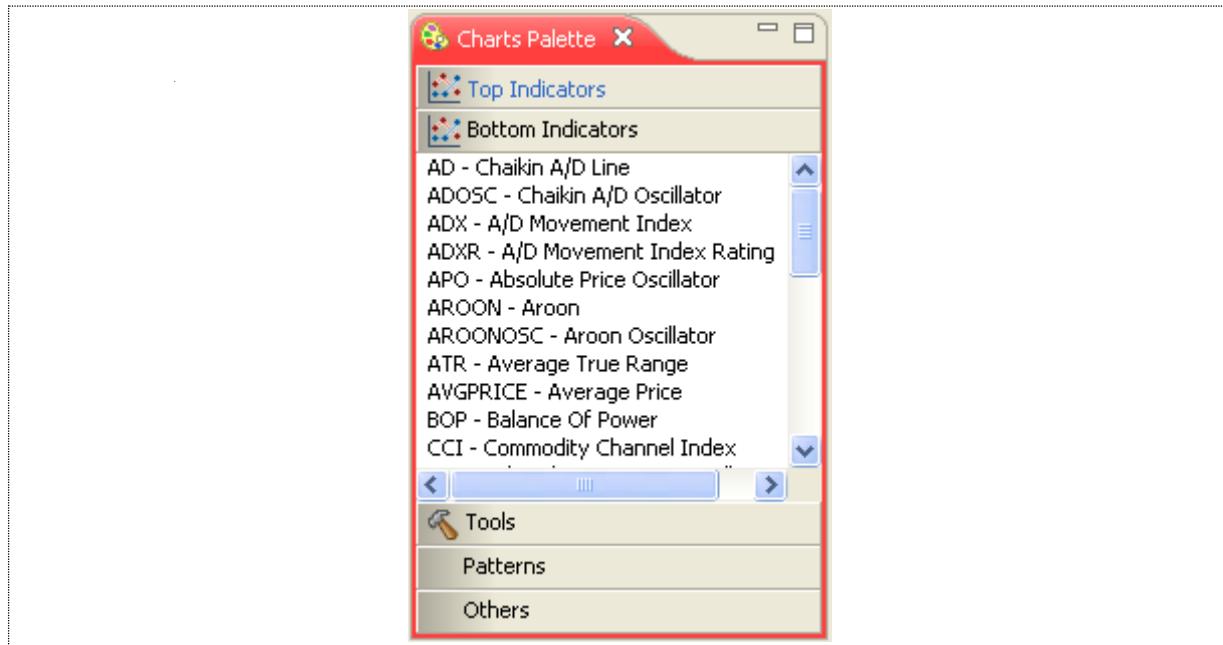

Figure 85: Bottom Indicators

Charts Perspective – Bottom Indicators (cont.)

To view a top indicator click on the indicator from the Charts Palette drag it and drop it onto the Chart view. Following window appears. In figure 77 and figure 78 Chaikin A/D Line is configured and displayed.

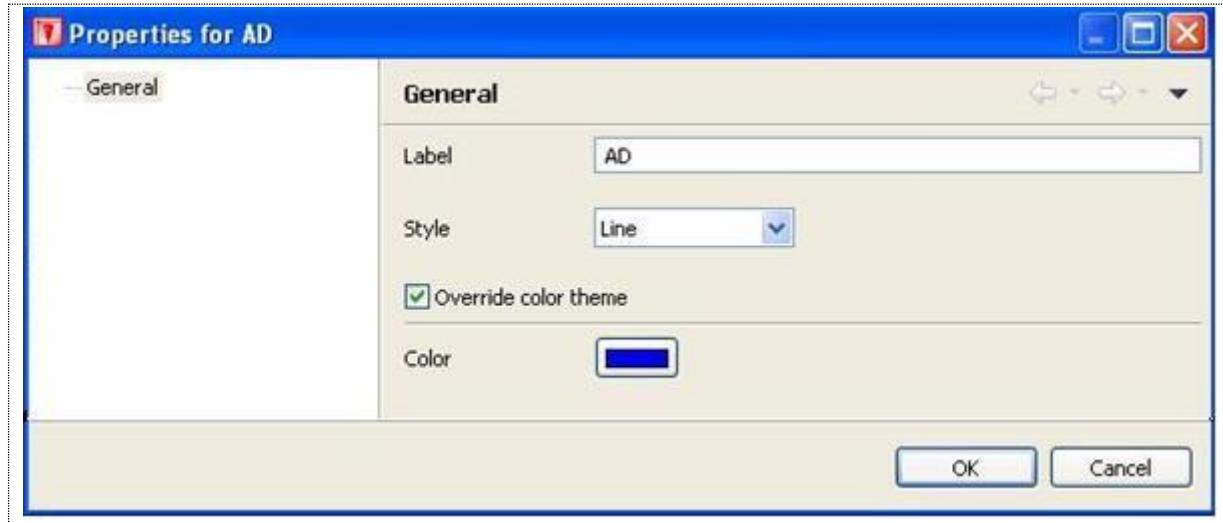

Figure 86: Bottom Indicators

Give the label and Style. Check “**Order ride color theme**” if you want to change color of the line, and press OK. Following chart appears.

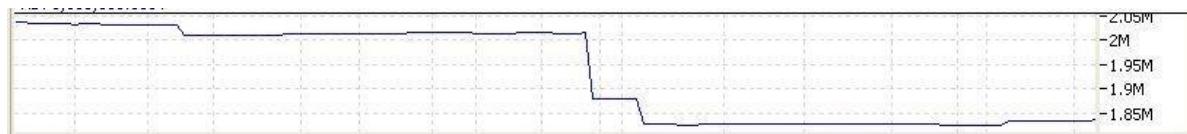

Figure 86: Bottom Indicators

Similarly other Bottom Indicator can be displayed.

Charts Perspective - Tools

FanLine, FiboArc, FiboLine and Line tools are available in the terminal.

To draw a FanLine, drag FanLine from charts palette – tools and drop it onto Charts view. FanLine is displayed in the chart.

Figure 87: FanLine

To draw a FiboArc, drag FiboArc from charts palette – tools and drop it onto Charts view. FiboArc is displayed in the chart.

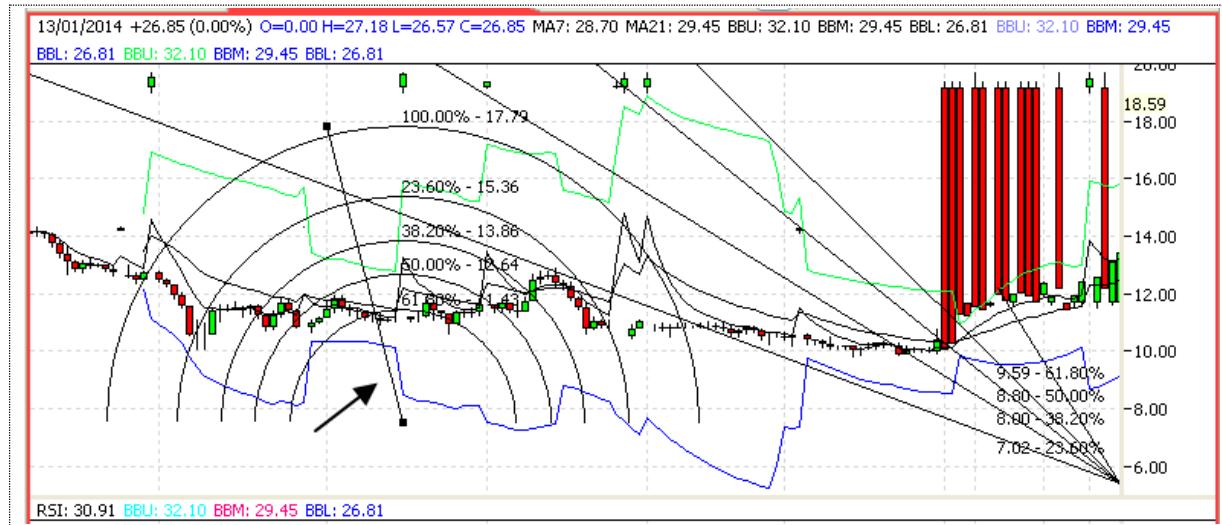

Figure 88: FiboArc

Charts Perspective – Tools (cont.)

To draw a FiboLine, drag FiboLine from charts palette – tools and drop it onto Charts view. FiboLine is displayed in the chart.

Figure 89: Fibo Line

To draw a simple Line, drag Line from charts palette – tools and drop it onto Charts view. Line is displayed in the chart.

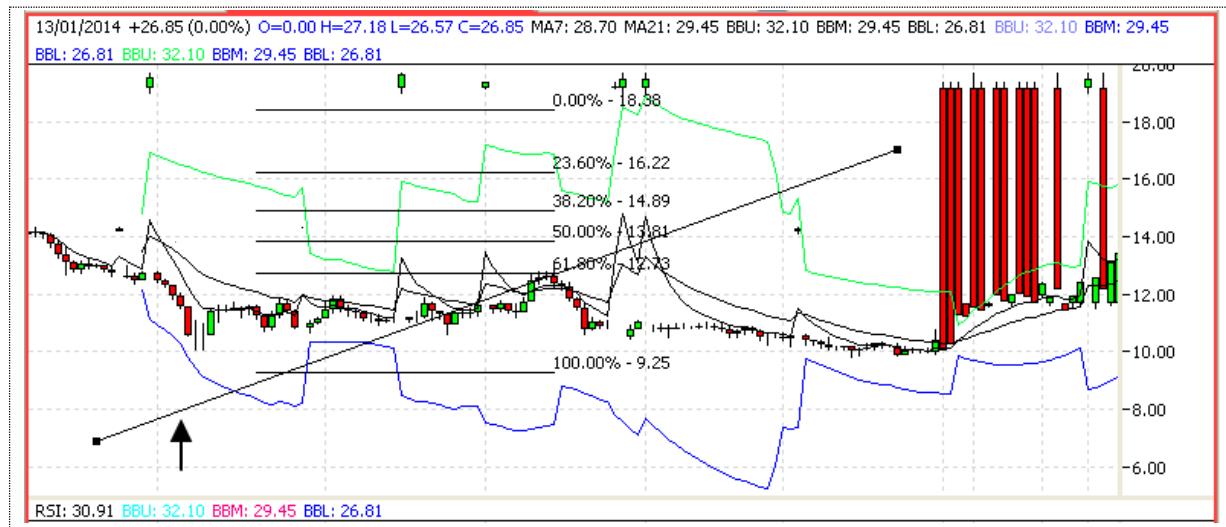

Figure 90: FiboLine

Charts Perspective - Patterns

Different Patterns can be displayed by dragging it and dropping it onto the Charts view. Following patterns are available.

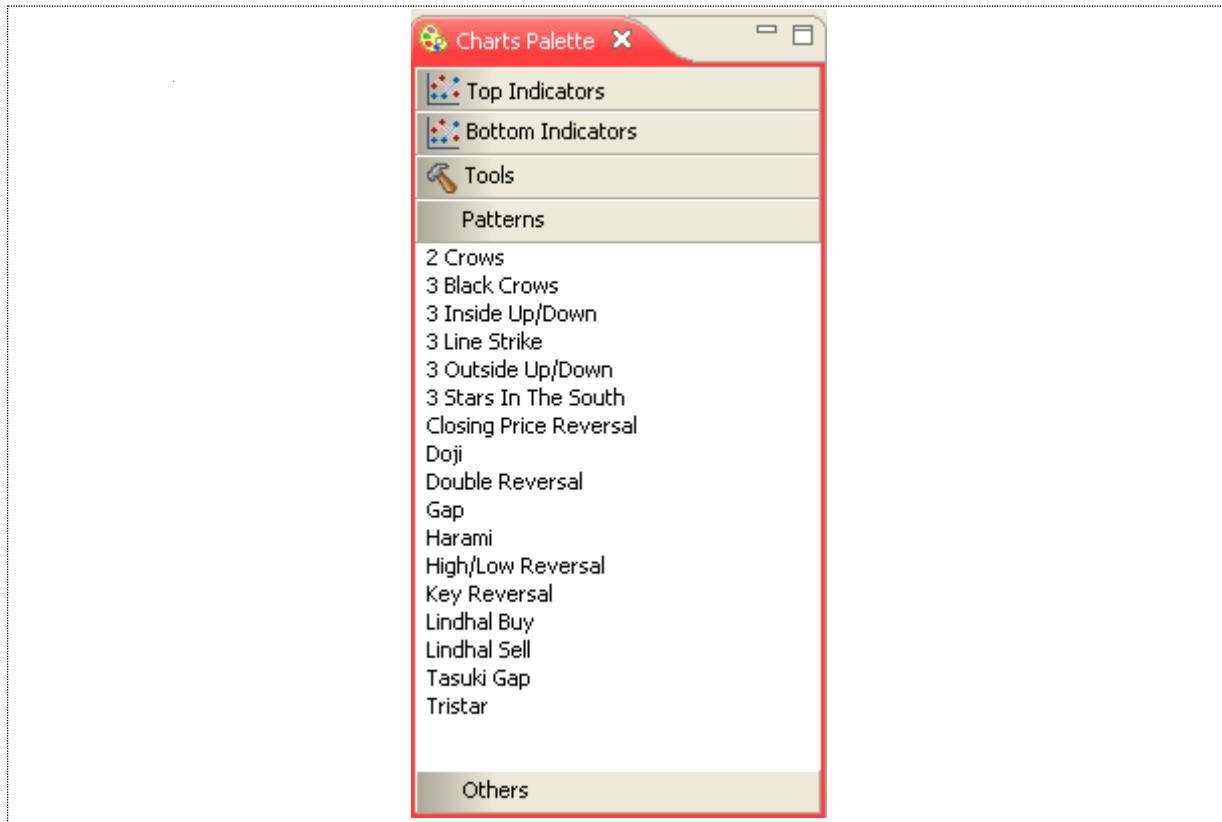

Figure 91: Patterns

Charts Perspective – Patterns (cont.)

For example, for viewing Closing Price Reversal drag it and drop it onto the Charts view. It will be displayed as shown in figure 84.

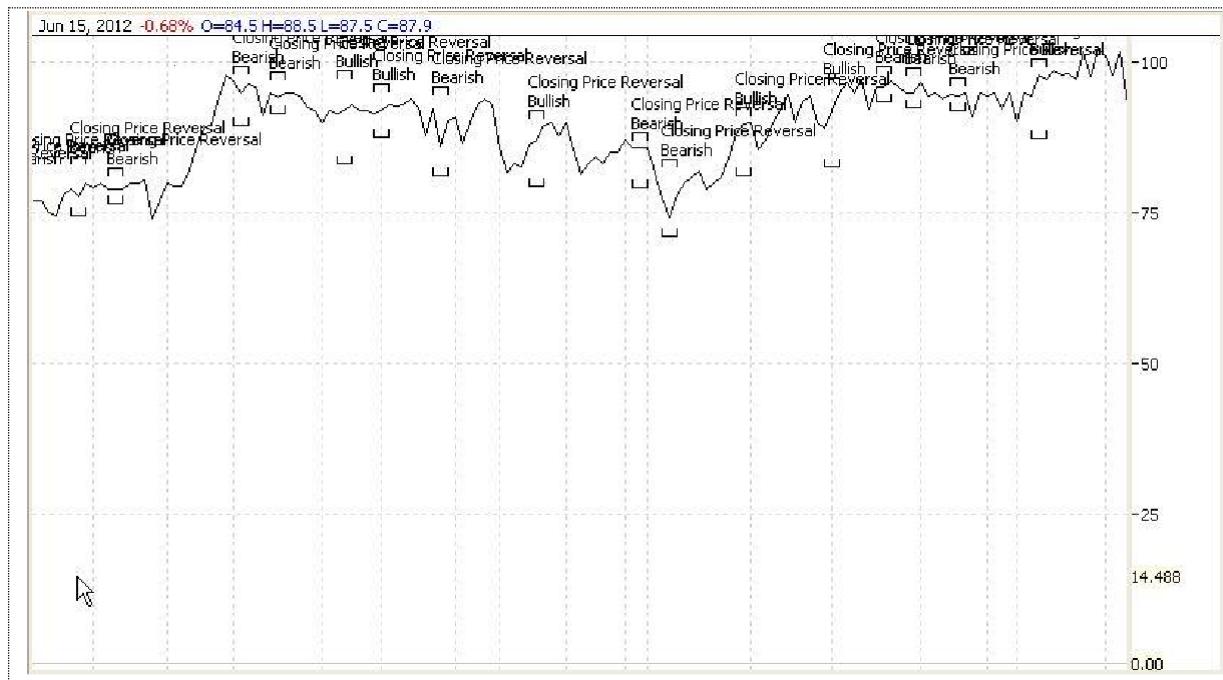

Figure 92: Patterns

Charts Perspective - Others

In others volume can be viewed.

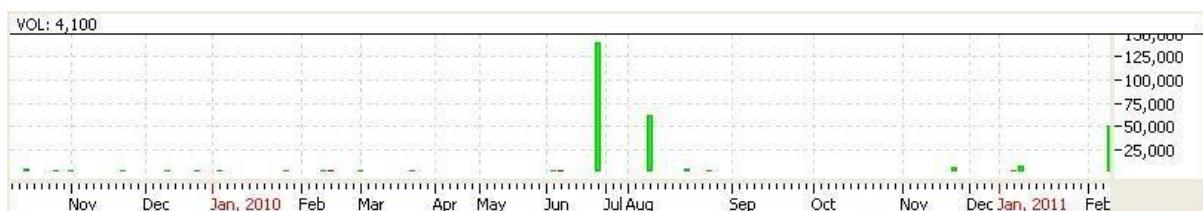

Figure 93: Volume

Charts Zoom Options

User has provided with the option to Zoom in and Zoom out charts of any symbol as required. Zoom in and Zoom out options is available below the top menu bar as shown in the picture encircled below. User is simply required to select the symbol from right side and select chart view. Once chart view displayed it can be either Zoom in or Zoom out. Follow the highlighted area.

 **Reports Menu - Outstanding Orders**

Navigation:

This report contains all the outstanding orders those who are not yet traded. Whenever a new order of buy or sell is placed it is shown in this report until it is traded. The outstanding Orders are only omitted from the screen when either of the order is traded in the market or user cancels the order by clicking the Cancel link.

The screenshot shows a report titled "Softech System Outstanding Orders Report" for Client Code RMS01. The report header includes fields for Client Code (RMS01), Sub Code (empty), Symbol (empty), Exchange (All), Fetch, and Print. Below the header, there are sections for Client details (Client: RMS01, Date: 18/01/2014, Exchange: ALL) and Report details (Client Name: RMS Client, Client Lot Code: TRDZ190002, User: RMS01, Time: 16:07:52). The main table lists outstanding orders with columns: Client Code, Sub Code, Order Number, Ref Order No., Order Time Stamp, Exchange, Market, Symbol, Side, Order Nature, Rate, Volume, Exec Volume, and Status. The data shows four orders for RMS Client RMS01, with various exchange codes like KSE, REG, OGD, MCB, PSO and market types like PPL, BUY LIMIT, etc. The status for all orders is "Queued". At the bottom of the report, it says "End of Report".
